

- (b) L'échelle sera de longueur et de solidité suffisantes.
- (c) Les échelons seront de largeur suffisante.
- (d) Deux tireveilles solidement assujetties seront, lorsque les circonstances le demandent, employées en même temps que les échelles.
- (e) Des dispositions seront prises pour que le pilote puisse passer sans danger du haut de l'échelle sur le pont du navire.
- (f) Des traverses placées à intervalles raisonnables seront installées, le cas échéant, pour empêcher l'échelle de tourner.
- (g) De nuit, on devra tenir prêt et employer un fanal projetant de la lumière hors du bord.

(a) The term "stair" includes stairs, ladders, gangways, ladders, and other means of access to and from the deck, and the provisions of this chapter shall apply to them as if they were stairs.

(b) Any equipment which is used for the purpose of climbing shall be of proper construction and shall be properly secured to the structure of the vessel.

(c) The rungs of any ladder shall be of uniform width and shall be spaced so that the feet of a person climbing can rest firmly on them. The rungs shall be of such length that they will project sufficiently to be grasped by the hands and feet of a person climbing.

(d) The rungs of any ladder shall be of such length that they will project sufficiently to be grasped by the hands and feet of a person climbing.

(e) The rungs of any ladder shall be of such length that they will project sufficiently to be grasped by the hands and feet of a person climbing.

(f) The rungs of any ladder shall be of such length that they will project sufficiently to be grasped by the hands and feet of a person climbing.

(g) The rungs of any ladder shall be of such length that they will project sufficiently to be grasped by the hands and feet of a person climbing.
