

public and to keep them interested. It is also generally felt that a second complete survey should be made three years from now to measure progress since the first survey and to draft a further programme of recommendations.

Public Health does not stand still, and from time to time we should take stock and consider the development of this work in Montreal in the light of the newer possibilities which will be opened as time goes on.

The General Health League has passed to the Survey Committee the responsibility of furthering the development of the Health Department. I would like to have your views, as a member of the Committee, on the suggested further activities of the Committee, and your assurance that you will continue, as a member, to support them.

Ever yours faithfully,
