

Gravel adapted for the purposes referred to was met with in the vicinity of Chatham, Douglastown, Newcastle, Bartibogue and numerous other localities.

Peat is abundant and of great thickness and excellent quality. Should this article ever be required for fuel in northern New Brunswick, or for any other purpose, there is here an almost inexhaustible supply. The particular localities where the larger peat bogs occur, together with brief descriptions of them, are found on pp. 22-25 N, (this report.)

Bog iron-ore was observed on the south side of Tracadie River in small quantities. It was also noted on the North-West Miramichi in the vicinity of Chaplin Island. Clay associated with it and coloured therefrom is, at the latter place, used as a red paint for the outside of buildings.
