

# YOU CANNOT AFFORD TO THROW MONEY AWAY.

Neither can you afford to let your competitor have an enormous advantage over you in a business way.

Each day that you neglect to put in an Allis Double Cutting Band Mill or a double cutting addition to your Allis Band Mill you are literally throwing money away. You are also letting your competitor get a serious business advantage over you.

## WHY?

1st. The Allis Double Cutting addition increases the output of your Allis mill from 30 to 40 per cent. without any increase in the cost of operation, thus increasing your profits fully one-third.

2nd. We are selling many Allis Double Bands. Your competitors are buying them and making one-third more profit from the same expense for labor as the owner of a single Allis Band Mill.

The answer is easy; get an Allis Double Band. Its cost is trivial compared to its accomplishments. You can figure for yourself how long it will take an Allis to pay for itself.

Another pointer. Our Allis Steam Set will make an additional increase of 10% in the output of your mill without increased expense for operation.

More about these money makers for the asking.
