The Standard Channel Steel Roller Bearing Dry Kiln Truck

has wheels of malleable—not cast—iron. The cast iron wheel seems to be good enough for other trucks ; but it's not for "The Standard."

Malleable iron more than doubles durability. Of course it costs us more—but get the prices before you decide that it's going to make the truck cost you more than you want to pay.

Then the roller bearings. We've a new way of making them—with pin-pointed ends—which reduces the friction to a minimum, and makes "The Standard" truck far the easiest-running on the market.

Catalogue "D" shows all the styles and parts and tells about them. May we send you a copy?
