made by their crowding and interfering with each other's Means of Subliftence. Was the Face of the Earth vacant of other Plants, it might be gradually fowed and overfpread with one Kind only; as for Instance, with Fennel; and were it empty of other Inhabitants, it might in a few Ages be replenished from one Nation only; as for Inftance, with Englishmen. Thus there are fuppofed to be now upwards of one Million English Souls in North-America, (tho''tis thought fcarce 80,000 have been brought over Sea) and yet perhaps there is not one the fewer in Britain, but rather many more, on Account of the Employment the Colonies afford to Manufacturers at Home. This Million doubling, fuppofe but once in 25 Years, will in another Century be more than the People of England, and the greateft Number of Englishmen will be on this Side the Water. What an Accession of Power to the Britifb Empire by Sea as well as Land! What Increase of Trade and Navigation! What Numbers of Ships and Seamen! We have been here but little more than 100 Years, and yet the Force of our Privateers in the late War, united, was greater, both in Men and Guns, than that of the whole British Navy in Queen Elizabeth's Time.--How important an Affair then to Britain, is the prefent Treaty for fettling the Bounds between her Colonies and the French, and how careful fhould fhe be to fecure Room enough, fince on the Room depends fo much the Increase of her People?

23. In
