It is likely that we have a dealer in your vicinity. If you will write us and ask for a copy of our new booklet entitled "George Brinton's Wife" we will send you the name of the 1900 dealer near you.

## "I'll Do The Wash"

All washing machines cleanse the clothes by forcing the water back and forth through the material. But in the 1900 Cataract Washer, the water swirls through them in a *Figure 8 movement* which forces it through them *four times* as often as in the ordinary washer!

Then, too, in the 1900, there are no parts in the tub to rub against the clothes and cause wear and tear. The water is forced through the clothes by the movement of the tub alone, and not by the action of any parts in the tub.

Completely solves your wash-day problem. Washes clothes just as you would wash a treasured piece of dainty lingerie, gently and carefully; yet it successfully separates all the dirt from the fabric, whether it be heavy blanket or sheer handkerchief.

Even the wringer works electrically, and is movable! You can swing it from the washer to rinse water to clothes basket without moving or shifting washer an inch.

It costs less than 2¢ an hour to operate a 1900 Washer, and a tubful of clothes is washed clean and spotless in 6 to 10 minutes.
