### **JOSEPH WAGNER** LOUISVILLE RESULTS

Ida Boosts Red.

Red Fisher was the big fellow on Saturday, and besides getting six hits, which is one more than the manager has had all season, he played two nice games. In the first he held Crable down beautifully, and in the second he did just as well for Herche. There were a couple of flies which some folks thought that he should have got, but after his gilt-edged performance with the willow no one could have a comeback. He has one perfect throw to second, and it will be a clever base-runner who will get away with a steal, providing, of course, that he gets the signal. Not only that, but what is more likable still he knows enough to keep his conversation abilities out of the game when the umpire is doing the talking, and in this way he will never make any enemies either here or in the big leagues. CHAMPION BILLIARDIST ORDERED TO THE COLORS. London, June 8.—Melbourne Inman, the English billiard champon, has been refused further exemption from joining the colors, and been ordered to report himself directly he is called upon for

However, Bugs appears to be just as happy when he is floopping badily as when he is going like a race hosse, this probably being one of the reasons for his popularity. The boy Thrasher was right "there' and doing nicely, too, thank you. Anderson did not do so badily at second, but he appears to be just a little too anxious. However, when you take into consideration the fact that he is a pitcher and not a fielder you can overlook a lot. Onslow had a nice second game, and he would undoubtedly have had a good first one had he not felt it his duty to lead the "Red Guard" into battle, but as it was Eddle bowed out without much applause.

Today we have Arthur Irwin and his wang of lida, who do exactly as they are told, even to working the hit and are told, even to working the hit and here made a splendid rally and subscribed his largest amount, since list.

### Dunlop Means "Original"

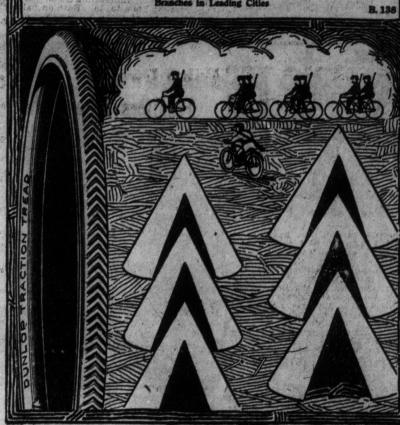

When you hear a bicycle owner say his tires are the original, not the imitation, he means that all other wiredon bicycle tires took Dunlop Tires for their model, because Dunlop was first in the field.

The Pneumatic Tire Industry rests on the name "Dunlop. And next in importance to your realizing that fact is the necessity for realizing this one: Dunlop Tires from the first—1894—were made by a patented process.

We found the way to make them right a way that would impart to them such road mastery, such superiority of toughness and resiliency that they would sell eight times faster than any other make of bicycle tires. Eighty per cent. of all bicycle tires sold in Canada are Dunlor
