SALES ACT AS CHECK ON ADVANCES.

Monday Evening, Oct. 28.

The financial atmosphere is still ruffled. Further outbreaks of

distrust of American institutions, which came into evidence to-day,

sent chills thru the New York market, and these were not unreflected

here. Keen competition occurred for the free gold in the London

market to-day, but this was obtained almost without regard to price by

the United States. Supporting interests in some of the stocks listed

locally made a strong demonstration at the opening, but their efforts

were not assisted to any great extent by the public, and prices sub-

sided with a renewal of offerings. A good-sized volume of business

was transacted at the Toronto market, and the selling was sufficient

to hold quotations in check, with some slight advantage at the close.

The sharp upward swing in Mackay, with a subsequent reaction of

over three points, was not conducive to a more settled sentiment re-

Charles Head & Co. to R. R. Bongard:
A decided contraction took place in the dealings in the stock market to-day.
This was due to the virtual suspension of all purchases on margin. The buy-ling which took place was consequently of the best character, namely, outright for cash. The reassuring advices which went over Sunday to London caused a sharp rally in Americans at that centre. The response here was by no means so pronounced, but in several proportant instances there were initial gains of a point, and in the afternoon dealings the buying movement suffered some diminution, and the general tendency of prices became reactionary. The market ended irregular, and, in most instances, finished at approximate low figures to-day.

balance. One bright spot is the advancing tendency of silver, tin and copper, heavy sales being reported in copper to-day for China, and it is understood that a large part of accumulated stocks of the metal has been disposed of without as yet supplying any material part of the large home requirements which must soon be satisfied. London is buying stocks as freely as the market for cable exchange permits. Only \$15,000,000 of the \$50,000,000 Pennsylvania loan remains to be paid off at maturity. Nov. 1. The market has been largely a cash proposition, with very little marginal trading. Stocks are extraordinarily cheep, and appear a purchase on concessions.

A. O. Brown & Co. to J. Lorne Campbell: Conditions appear to be much settled, and leading financiers seem to believe that the crisis has passed. With no unfavorable development over night, the feeling probably will be much more cheerful to-morrow morning.

Cotton Gossip.

Marshall, Spader & Co. to J. G. Beaty: The market was dull and heavy to-day, about the only support coming from short covering, and even this did not endure thruout the session. Conditions in financial markets offset the rather more favorable cables than expected, and most of the local operators were against the market. Demand sterling sold at 481.50 to-day, which is the lowest price we recall for over fifteen years, if not longer, and the fact that time sterling tills, with cotton-shipping papers, cannot be disposed of, is, a very depressing factor of the situation.

The cotton goods trade is fast becoming demoralized, and even in the print cloth market there is a disposition to regard prices as speculative, and largely the result of the buying by one printing concern in Fall River. Evidence of the Most Revolting Character in Berlin Case-Widely Published.

LONDON, Oct. 28.-It will be difficult to describe the effect thrubut Europe of the amazing scandals disclosed in the Berlin libel suit of Count von Moltke against Editor Harden. The worst feature of the case is in

the extraordinary degree of license assumed by the press in printing the details of the evidence.

Never, perhaps, in the history of journalism in any country, has such a mass of offensive matter been spread before newspaper readers of all classes. So far as is known there is no pub lic protest against this action of the newspapers, which is not only taken as a matter of course, but the demand for every scrap of evidence seems well nigh universal. Even the most re-spectacle contingent of the London newspapers reproduces columns of evi-dence, which no American paper would venture to offer to its readers by pub

Ilshing.

This case, in fact, furnishes a significant demonstration that "yellow Journalism" in Great Britain and Europe is held in check only by fear of the libel laws, and when disgusting matters become technically privileged under the proceedings of a law court then the European press becomes far more "yellow" than the worst American of fonder.
