ten Jock and Jenny were intent or matrim lerly friend addressed them in language ily remonstrance on their " impruden wrote in reply : --

LITTLE LADIES ON LARGE ONES 2—Alice and Flora wish to know whether the gentlemen prefer little ladies or large ones? All depends upon love. If a gentleman fails in love with a large one he does not like the little ones : and when he fails in love with a little one he does not like the large ones. Very tall men frequently marry little we men. "A wise ordination?" as a haly once re-marked. It provents the imman face from rising too high steeplewards : though Nature very often spontaneously corrects hersoff by giving very tall children to very little parents.-" Notices to Cor-respondents,"—Family Herad.

A WONDER- J Popular Tax. A gentleman who sigus himself "One of the Euclands of Eng-land," has sent in a proposal to Lord John Russell for mising a new tax, which would have the novely of being a great relief to the suffering community. besides checkling a growing evil. It is to apply the patent mile index to the tongues of women, and charge them so much a mile. He calculates the loan of 2800,000 would be paid eff in less than six months. We can see but one objection, and that is, the enermous noise there will be in conse-quence of the endless disputes of the fare. -Pauch

Not A NICE HOUSE.--" Mama," said a little fellow whose mother forbad him to draw horses and ships on the mahogany sideboard with a sharp nail, " Mamma, this sin't a nice house. At Sam Rackett's we can cut the sofn, and pull out the hair, and ride the shovel and tongs over the carpet, but here we can't get any fun at all."

Did you ever sit down to tea where skim milk was on the table, without being asked, " Do you take cream, Sir ?"

SANDS' SARSAPARILLA.

THE fame of this preparation is not confined to the limits of our own country, but by its pow-erful agency in arresting and curing disease, has won its way successfully into different countries in Europe, as the following unsolicited testimonials from individuals of the highest respectability shows in the next.

Europe, as the rolowing unsolucited testimonials from individuals of the highest respectibility shows in the most conclusive and satisfactory manner which has always marked its course where even adopted, and diseases have yielded to its health-restoring influence which Medical Men of profound skill had pronounced incurable. The most potent is preparation, and the combination is such that one molities and inproves the other, and under the name of Smids Scrapparilla, is presented a com-pound differing entirely in its character and pro-perties from any other preparation, and univalled in its operation on the system when laboring un-der disease. Its approval by Physicians and mer of Science, and the uniform success which has marked its use, furnishes proof sufficient to con-vince every candid and discerning mind of its great superiority and value.
