

PROCEEDINGS IN MEDICINE.

The Faculty of Medicine has its seat in Montreal (Ontario and Mance Streets). Convocations are held annually for the conferring of Medical Degrees in that City.

The Degrees of this Faculty are those of Master of Surgery (C.M.) and Doctor of Medicine (M.D.), the former being conferred only upon those who at the same time obtain the Degree of Doctor of Medicine.

The College building contains large lecture rooms, several smaller lecture rooms for Practical Chemistry, Practical Physiology, Histology, Bacteriology, etc., and large, airy, well-lighted dissecting rooms at the top of the building, isolated from the rest of the class-rooms. Under the new Anatomy Act of the Province of Québec, ample material for dissection is provided at moderate rates.

The Histological, Physiological and Bacteriological Laboratories are supplied with a complete outfit of Microscopes, Microtomes and of Bacteriological and other modern apparatus. The Pharmacological Laboratory, besides possessing a very complete cabinet of drugs and their preparations and alkaloids, has all the necessary appliances and means for the working of B. P. preparations and every facility for practical dispensing. Recently the Faculty has expended another large sum for apparatus in several departments, to facilitate practical teaching.

The 28th session of this Faculty will commence on Monday, 3rd October, 1898, and will be continued regularly until June, the usual Christmas vacation intervening.

The course leading to the degree of C.M., M.D., extends over four years, and consists of four sessions of six months each, and three Summer Sessions. Students who require the Quebec license will be given an extended course in order to comply with Quebec laws.
