MORE LIVES ARE EXPENSIVE WOODS IN NEW YORK YARDS. look Like Supplies for Kindling-

Wood Factory, But They're the Most Expensive to Be Had.

New York, Aug. 31.—Over in the east side lumber yards, along the waterfron⁴ from Fifth up to about Tenth street, there may be seen piles on piles of coarsely-heavn, dirty-looking logs—generally in rough, unsymmetrical heaps unlike the stacks of seasoned pine and other more common building-boards. An ignorant ob-server might take them to be supplies for a kindling wood factory and certainly common binding boards. An ignorant of server might take them to be supplies for a kindling wood factory and certainly, would be surprised to learn that these dirty stocks of timber are the most vau-able woods in the world in their rough form, for that is what they are. There is mahogany, for instance, any quantity of it; ebony, Black Sea walnut and costly snakewood; but it all lies there seemingly unguarded and beaten by the weather as though it were the cheapest sort of white pine. That is the wood that some day will be worked over, pol-ished and made into the most beautiful woodwork that money can buy, or into expensive furniture. One big log may be worth \$2,000, and a log of mahogany has been known to be sold for \$9,000. It was 28 feet long and 5 feet thick, and was the finest piece of the wood ever brought to Naw Yoak

"The value of each stick is determined by its marking and freedom from flaws. When the logs are sold in the rough, as you see them here, there is a big element of chance in their purchase. The expert can judge them only by outward appearances and must be able to tell by the general look of the logs whether they are sound and whether the marking which shows on the outside is apt to continue through the piece. After a good deal of experience, one is able to size up a piece of timber pretty correct-ly, but we are all fooled once in a while, and that is one of the uncertainties of the 09.00 <text> he might of the 25th 1 00 HEW. ing made r, forcing l reach of nd stock o follow with ma

mp erial Government Has Sanctioned Reopening of Trade Negotiations' Between Newfoundland and United States.

Montreal, Sept. 1-(Special)-"It is true that the imperial government has sanc-tioned the re-opening of negotiations for a trade arrangement between Newfound-land and the United States and I will leave for Washington immediately for this

purpose. I am not in a position, however, to make any further statement in regard This important statement was made last evening by Sir Robert Bond, prime min-ister of Newfoundland, on his arrival toister of Newfoundland, on his arrival to-day by the steamer Pretorian and it is understood that he will leave for the American capital this afternoon. Sir Robert said he could not describe just now Canada's probable attitude in the matter. The Newfoundland premier has also a project in hand for the establishment of a faist line of steamers between Galway and St. John's (Nfd.), using B. S. Reid'a raikway across the ancient colony. railway across the ancient colony.

But he was so blamed busy exhorting others to give out of the fullness with which the Lord had blessed them that he sort of forgot that the Lord had blessed him about \$50,000 worth, and put it all in mighty safe property, too, you bet. The deacon had a brother in Chicago whom he used to call a sore trial. Brother Bill was a broker on the Chicago Board of Trade, and, according to the deacon, he was not only engaged in a sinful occu-pation, but he was a mighty poor stew-ard of his sinful gains.
