

VALLEY RAILWAYS LINE

F. B. Carvell, M. P., Tells of Personal Observation Along St. John Valley Railway Route—Up Hill and Down Like Any Trolley Line—Attitude Labor on Public Roads Must Go, He Says.

Thursday, July 31.
"It is really disheartening to see what a miserable trolley line has been built between Fredericton and Centreville," said F. B. Carvell, M. P. for Carleton county, on his latest trip to the city last evening, in speaking of the observations he had made on an automobile trip from Woodstock to Fredericton along the line of the new St. John Valley railway.
"The company is getting a subsidy of \$81,000 and a tramway line I should say worth about \$16,000 a mile, has been built. In two places at least the road is from 100 to 200 feet above the river level and it follows the contour of the land, up hill and down, like any tramway line."
"As for the Grand Falls connection," said Mr. Carvell, "I know long ago this would never be built. The minister of railways told us in the house last week that the connection would not be made and many of us knew it long before that."
"The only reason," said Mr. Carvell, "that the Gagetown-St. John section is not being proceeded with is because the Mrs. Campbell money in Donkey Bay construction are trying to avoid the expensive bridges over the St. John and Kennecobiscus rivers. I look for the road still to be hauled in by the C. P. R. at Welsford or possibly Westfield."
"The Highway Roads."
Mr. Carvell is out on a pleasure jaunt with his automobile, but said the trip from Woodstock to Fredericton on Tuesday and from Fredericton on yesterday, was very strenuous.
"Between Fredericton and Westfield," he said, "the roads are nothing short of damnable. It shows that statute labor has got to go. First there will be a short piece in good shape followed by a stretch something horrible. I should say, too, that the use of the road machine prevents the roads from being in any shape around the culverts are left untouched and the sods thrown up where the roads are really good."
"Mr. Carvell said party will leave for St. Andrews this morning."

PRIVATE USE OF GOVERNMENT CARS

(Vancouver Sun).
Government private cars and their use have become a cause of investigation in parliament, owing to complaints that these private cars, paid for by the whole people of Canada, had been used for private purposes. The complaints have been made in the past there was never a more flagrant case of the abuse of the private car system than that which is now in process in Vancouver.
A week or so ago the brother of the premier of Canada, H. E. Borden, of the Conservative party, was accompanied by his daughter and son, and accompanied by A. E. Blount, the private secretary of the prime minister for many years. Mrs. Borden and her party were in the car when they were seen to enter the car which was used for the private secretary of the premier. ONE MAINE FARMER HAS EIGHTY ACRES OF POTATOES IN BLOOM AND HE EXPECTS TO SAVE THEM ALL—HIS CROP WORTH NEARLY \$4,000.

(Arroostook Times, Houlton).
Among the many beautiful sights in this section at this season of the year are the potato fields, which now in many cases cover the ground.
While in any direction one may see these sights, probably the largest is that of A. E. Moores, on the north side of the county road beyond the farm buildings.
Mr. Moores has eighty acres in potatoes and he has reason to be proud of the way they look.
With an average yield of eighty bushels to the acre this Maine farmer will harvest 6,400 bushels and he will expect to get at least \$1.50 a barrel for them in the field, which will net him \$9,600. Where is the New Brunswick farmer who would take a chance on such a crop?

HOT WEATHER COME LATER THIS YEAR

Wednesday was Hottest Day of Year and All This Week Mercury Stood Higher Than in Same Period Last Year.

Those who have been compelled to work in the sun during this week have found that the heat was a little more evident than is usual in St. John and Wednesday saw the thermometer at its highest point it has reached during this year. July has been warmer than in any other month since the thermometer was first used here. The highest point reached, this being on July 2. On July 1, 1913, the lowest point to which the mercury went was 43 above, which made a record for the month but during July of the present year the thermometer did not get within seven degrees of that point.
The following is a comparative statement of the maximum and minimum temperatures recorded during the last four days of July both this year and last:

OF INTEREST TO WOMEN

Plain casted, cold and poured over three cupsful of sliced oranges makes a delicious dessert for hot weather.
Grapes and apples are among the most nutritious fruits and should be freely eaten, even by the most delicate. A little lemon juice will keep them fresh. Methylated spirits, finally freshening it with chloroform to restore the color.
Frybread powder burned in a room serves as a deterrent for hot weather. It is put up and put there flies ought to be.
In the summer delirious informal entertaining may be done with the help of paper tablecloths, dishes and napkins.
It doesn't take any more time to prepare less than to make pies, and they are far less desirable for hot weather.
Before starting to eat fruit, see that the tops of your fruit jars fit, and that you have a good supply of rubbers on hand for the jars.
Where it is impossible to get ice, food can be kept cool by placing it in a large crock and setting the crock in a basin of water.
A bit of fine mosquito netting placed under the hole in a stocking, and used as a foundation for the darn, is a great help.
Housekeepers should plan to have simple meals, especially dinners, in hot weather, using fruit always instead of made desserts.
Mrs. Maves with French dressing with Mrs. Theo. Vantour by Miss McLaughlin, of Bouchette; Miss James, of Shelburne; and Mr. Douglas, of Bouchette.
While each number was thoroughly enjoyed, special mention should be made of those contributed by Mrs. Russell, of Mrs. Melanson. Mrs. Russell possesses a soprano voice of rare flexibility and expression, taking the highest notes with perfect ease. Her unaffected manner is also very attractive. Mr. Melanson has a splendid baritone and delighted the audience.

UNION CARDS REMOVED.

Conditions in the Journeyman barbers' strike grow no more encouraging. The prospect of a compromise appears less probable as both the journeymen and master barbers are resolute in their attitudes. An executive committee of the organization visited the different shops Tuesday and removed the union cards from those that refused to countenance their proposals or had not signed the agreement and paid the assessment levied for the right to display the card. This operation was performed in six different shops where failing to comply with the union demands was certain. The striking barbers are being supported by the union and will be until the conditions are such that they return to work on the basis determined by the organization and not by the master barbers, was the way the president of the union described the feeling last evening.
