For all kinds of Farm Stock, will be found invaluable at this season of the year, when change of season requires change of diet, and the great object is to assist digestion, improve the appetite, and give a healthy tone to the stomach, invigorating the whole system, thereby assisting nature to throw off any disease that may exist, causing new blood to flow and the animal to thrive in much less time than it otherwise would. Animals will fatten with less expense, although fed on the same quality and quantity of food. It is also valuable for *Milk Cows and Calves*.
