Persons, who have not given the subject of advertising serious thought may be inclined to believe that standard products could be sold cheaper if the manuacturers did not spend so much in advertising them. The contrary is the truth.

Every concern which seeks a general market for its goods finds it necessary to set aside a certain sum each year for advertising, and this is charged as a part of the operating expenses, the same as rent, fuel or insurance. The aim of the advertising manager is to buy the largest circulation among persons who would be interested in his product.

> The meeting was called to order, with 1st Vice President, Karl Cleveland, in the chair. Several matters of interest to the Branch were dissed and carefully dealt with, after which the meeting aujourned and the tables were prepared for the "eats" which was brought in by the members.

The Entertaining Committee got the "cook" cornered and ordered him to get the drink ready, which he did to the satisfaction of everybody. A pleasant time was spent in eating and talking, after which the 'waiter' cleared up the 'debris' and put the room in ship-shape order again.

The Orchestra then played several selections, including the old favorite trench songs, after which they tried a few of the "latest hits." Eventually "God Save the King." was played and the comrades went home feeling that they had enjoyed another evening and believing that there are many more, just as good, in store for them if they attend the meetings during the present winter. present winter.

Frank W. Ashby, secretary of the Australian Manufacturers' Association, visiting here recently, said the impression in Australia was that Canada was the back door to the North Pole. People in the Antipodes think that Herschell Island and Baffin's Bay are linked up municipally with Montreal and Winnipeg, said. He was surprised to find the Dominion had a delightful climate and cities more modern than those

What is stated to be the biggest log jam in sixty years recently occurred on the Montreal River in a gorge through which the river flows into Lake Temiskaming. 300,000 logs were piled up to a height of 80 feet with a width of 250 yards, choking the river for 300 yards down at the point where the jam took place. An army of 100 men, working night and day for three days, at last succeeded in breaking the jam with

dynamite. -A three-week tour of Canada by teachers and their friends, under the auspices of Dean S. Laird, of Macdonald College, will leave Toronto July 20 on the Canadian Pacific Railway.
