## Ontario Government Nursery Station.

With the increasing gravity of the problem of dealing with the sand land areas in the older settled parts of the province of Ontario the importance of the Ontario Government Nursery Station increases. For a good many years the Government supplied from the nurseries connected with the Ontario Agricultural College at Guelph trees to farmers to restore their woodlots. More ag-

gressive action was taken three years ago, when the Department of Agriculture purchased some farms in the sand lands area of Norfolk county, and Professor E. J. Zavitz, forester to the Department, was authorized to move the forest nurseries from Guelph to the new station at St. Williams, and to begin the planting of these farms with trees suited to the locality. The idea of the off-
