

FROM THE ANNUITY COMPANY OF CANADA comes a wall calendar of novel device. It is so designed that the monthly date, instead of the day of the week, is fixed in position—this innovation being based on the assumption that in turning the eye to a calendar the first reference is often made in connection with the date of the month, rather than the day of the week. While a calendar of this sort may not supersede the more conventional type, it is certain to prove of convenience in the many instances where immediate information is wanted as to what day of the week a certain date falls upon.

THE NORWICH UNION FIRE INSURANCE SOCIETY'S home office report for 1906 shows that the net premium income was £1,169,783. The losses were £949,021, being 81.13 per cent. of the premiums. Of this amount £358,472 was due to the San Francisco disaster. After setting aside one-third of the premiums (£389,928) as a reserve against liabilities, the balance at the credit of profit and loss account was £280,505, out of which dividends were paid. A balance of £225,505 was carried forward.
