No Crop Produces Profits Like a Maple Grove

Take any crop that you grow and figure out how much profit you have left after paying for ploughing, seed, fertilizing, cultivating, harvesting, labor, keep of horses, wear and tear on machinery, etc. Add to your cost a month of hot, dry weather and you are lucky to come out even.

Now go to your nearest neighbor who has a sugar bush with up-to-date equipment, and ask him to tell you honestly how much syrup and sugar 100 average size maple trees will produce, how much he sells it for, and what it costs to make it.

You will find that, acre for acre, a sugar bush will produce a bigger profit than any other crop that you grow—and with less cost for equipment, with less labor, and in less time—besides the sugar season comes at a time of the year when no other work can be done.

Maple products are now higher in price than at any time in the history of the industry—let us show you how to produce the highest quality syrup and sugar and obtain the highest prices.

Ask us to-day to send you the fullest information about sugar making without cost to you.
