"LEADER" fence Lock

Newer and Stronger

Think of the strongest lock of which you know on a woven fence and multiply its strength two fold. You then have an idea of the strength of the Leader lock—the new lock with the double grip (single grip locks have hitherto been considered good enough for woven fences).

The "Leader" is a brand new No. 9 hard steel wire fence—more durable and a better investment than ever before offered.

For your main crop

P-E-A-S! Queer idea, you think? Field peas for a MAIN crop? Do you know field peas brought 87 cents a bushel last year? This year's export demand will be bigger. Peas crop, per acre, 38 bushels and 1 1/2 tons of straw (fine fodder). Guelph College recommends pea-planting. Easy crop to grow; SURE market,—crop that feeds the soil instead of tiring it. Good money for YOU in peas,—but get them in early,—April is best.

Frost Damages Many Roofings, But Not Brantford Roofing

In the same way that a rail on our railroads is affected by frost, so is metal roofing liable to split and warp, while our sheets of Asphalt and Rubber will withstand the attacks of frost without damage to the material.

It is true that frost will damage various asphalt roofings, but that is because the asphalt with which they are coated is of a brittle nature. Such roofing, if

laid on a surface with creases in it, will, when the temperature is low, break if one walks on it.

But not so with Brantford Roofing. It is saturated with a combination of asphalts so blended that the resulting composition, known as asphaltum, is unaffected by the lowest or highest degrees of temperature known in this country.

Sold at as low a price as a really good roofing can be sold—about one-third less than metal.
