HAIL INSURANCE

If you are interested in Hail Insurance ask our Agent for rates and other particulars. He can tell you what the protection will cost this season. Others can only tell you what it cost last year, and guess at what it may cost this year.

The two Royal Commissions appointed to investigate Hail Insurance in Manitoba (1899 and 1906) had absolutely no complaints against Companies that insure under yearly contracts. Why? They hold their business by treating their patrons right, not by a term contract that it is almost impossible to have cancelled no matter how unsatisfactory it may be.

JOS. CORNELL, MANAGER

Have You Grain

To Harvest?

WHEN you will be interested in harvesting machines—the certain, sure, dependable kind.

You will be interested in securing a binder which will do the work evenly, quickly and with the least possible strain upon man, team, and machine.

In short, you will want a Deering binder.

Being constructed so largely of steel, it combines greatest strength and durability with lightness.

Considering its adaptability to all kinds of land and to every grain crop, it is withal an exceedingly simple machine, being easy to handle and keep in order.

Perhaps the strongest feature of the Deering is its capacity to cleanly gather the grain.

The many and delicate adjustments of the reel make it possible to gather up tangled down grain almost equally as well as standing grain.

Deering binders are made to cut 5, 6, 7 or 8 feet wide.

The wide-cut machine is specially

adapted to the use of the large grain grower.

Its capacity is remarkable.

Capacity in a binder, by the way, is a most valuable quality in the busy, all too short, harvest days.

We have only space to touch upon a few of the Deering good points here.

Every intending purchaser of a binder should secure the Deering book and study the machine.

The Deering line of harvesting machines is complete and includes, besides grain and corn harvesting machines, binder twine, mowers, tedders, sweep rakes, side delivery rakes, hay loaders, stackers. Also a complete line of tillage implements and seeding machines, comprising disk drills, shoe drills, hoe drills, cultivators and seeders, smoothing, spring-tooth and disk harrows, land rollers and scufflers. Also gasoline engines, cream separators, hay presses, wagon, sleighs, and manure spreaders.

Call on the local Deering agent and discuss with him the qualities and advantages of Deering harvesting machines.

Any of the following branch houses will supply you with the Deering catalog.
