## BY AUTO ON THE GULF OF GEORGIA

An inspiring vista of the west coast Archipelago.

Sectional view of the "Motor Princess" showing method of storing cars.

WHO has not heard of the thousand isles of the Gulf of Georgia? This Gulf is a ramification of the great strait of Juan de Fuca famed in legend and history, through which the Spanish navigators sailed hundreds of years ago, and which is now one of the important trade routes of the world. It separates Vancouver Island from the mainland of British Columbia and the State of Washington, and is one of the most beautiful waterways known to man.

The city of Victoria, at the extreme south end of Vancouver Island, has several ferry lines connecting it with the mainland, out as the steamship services in the past have proved inadequate for the large crowds of summer visitors and motor tourists, the Canadian Pacific Railway Company has put into service a fast-going vessel which operates twice daily between Victoria and Bellingham, Washington. The ferry is an important addition to the Canadian Pacific fleet and its name, "Motor Princess," is appropriate in that it is the first vessel of the company, operating on the Pacific, to be equipped with internal combustion engines. These engines give the boat a speed of about fourteen knots. On the two main decks there is parking space for fifty automobiles, and there is well appointed accommodation for two hundred and fifty passengers, saloon, restaurant,

further entranced by the magnificent view of Mount Baker standing garbed in its everlasting mantle of snow among its satellites the foothills. This lordly mountain is on the mainland near Bellingham, and, beautiful and inspiring, it is seen at its best when travelling to or from Victoria.
