Indications Of Another Advance In Wheat Flour

Ottawa, March 31-A material advance in the price of flour in Canada is indicated in an announcement made here on behalf of the Canadian millers by George A. MacDonald re-presenting the Quaker Oats Company and head of the delegation of repre sentative millers which waited upon sentative millers which waited upon the government today to discuss the draining about 100,000 acres. serious situation which Canadian mills are facing as a result of the ac tion of the Canadian Wheat Board in continuing the restriction in the price of flour on the Canadian market and the lack of export markets for Can-adian flour. The increase will be necessary to meet the increasing cost

f manufacture it is understood. The scarcity of mill feed in Canada is directly traceable to the lack of a market for flour and the consequent decrease in the volume of domestic milling, the millers state. They have asked the government to modify the regulations of the wheat board and to co-operate with the millers in inducing foreign buyers to take a reasonable proportion of Canadian wheat as flour rather than as wheat.

Vast quantities of flour said to be available in the United States for export complicates the Canadian problem. It is said that more than 4. men have alrealy been thrown out of employment by the forced closing down of some of the mills of which there are about five hundred in

without distressing after effects. There is reason why you show that a is a medicine that will unfailingly counteract dyspepsia

THE UNION ADVOCATE Tete-A-Gaughe To Supply The North **Shore With Power**

Water Power Commission Find This Only Available Site With Storage Capacity - Will Give Manufacturers of That Section Cheaper Power.

The New Brunswick Water Power Commission in its report to the Government recommends that the North shore, from Newcastle to Campbelltou, be supplied by a development on the Tete-a-gaughe, that being the only site available where the necessry storage capacity can be obtained The report is as follows: "The third district under consider-

ation is the North Shore, from New castle and Chatham to Campbellton and the problem is to find a way if sible of supplying all these towns with light and power from a central plant. There is no possible power site near Campbellton where power could be deveoped at a cost in pro-portion to the comparatively small re quirement of a town of this size. The only large stream on the North Shore that has any considerable power possibilities is the Nepistouit, and this is now being developed by the Bathurst Lumber Company for their own use in supplying power to operate their present and contemplated pulp anl paper plant. After a careful study of this situation we were for ced to the conclusion that the only available stream is the Tete-a-gaughe which rises between the head waters of the Nepisiquit and the Unsalquitch

Warfare Starts Among Liberals

Mr. Mersereau of Sunbury - Promises to Say More on Floor of House.

Fredericton, April 2-Mr. Mersergusted with the actions and expres-sions of one of his own members. At a meeting of the Municipalities Committee yesterlay afternoon when an important hill affecting the finances of Municipal Councils was under discussion, warfare was started among the Liberals. Dr. McGrath, of New castle, in the course of his discussion cast a reflection upon the business ability of Councillors by referring to

them as "Moss Backs." Mr. Mersereau who is a Councillor resent the insult. He said: "I take years. The headaches are gone and exceptions to the uncalled for remy nerves are so steady that I can marks of the gentlemen from Newcastle. There are just as substantial and business-like men in our Council Tanlac has given me back my heal as are found in any group of men, th, and as long as I live I will never business or professional. It is no be able to praise it too highly." wonder the people of the country are turning against this; Government E. J. when one of its members gets on Wm. M. Sullivan. his feet and makes such a remark.

And, sir, I shall have more to say about it on the floors of this House."

The member from Newcastle reddened to the roots of his hair while member from Sunbury was livid with rage.

The affair caused Liberal leader much ooncern while others looked on with considerable amusement.

GRANTS ANNUAL PASSESJ

C. P. R. Encourages Loyalty in Service.

The C.P.R., to encourage loyally in service, and recognize the prin-ciple of co-operation has, through the president, Mr. E. W. Beatty, announced a new departure which w.i., doubtless, be much appreciated. This is the granting of annual passes to officers and employees and their wives under the following

classifications:
Employee on a general superintendent's district, who has had contegocarts district, who has had con-tinuous service for a period of not less than ten years, will be granted an annual pass good over district on which employed. Such employee, who has had con-tinuous service for twenty years and

finious service for twenty years and over, will be allowed annual pass good over eastern or western lines upon whichever employed. Employee of any other department of the service will enjoy the same privilege as above, stating the territory over which pass is desired. Head office employees who have had

Head office employees who have had fitteen years' service will receive annual passes over eastern or western lines where employed. Women employees are to be treated the same as men in this connection. This action expresses the policy of the C.P.R. to aim at the contentment and loyalty of the employees of whom there is an army of 50,000 at present, including all classes.

The Pension Pund, a free gift of the company, was the thought of the company, was the thought of Lord Shaughnessy. The employees contribute nothing. Already the operation of the fund has wrought great benefit. The effect of it has been to increase the contentment and levalty of the employees, to give the same of the employees, to give the same of the employees, to give the same of the contentment and levalty of the employees, to give the same of the contentment of the co

Had Not A Well Day In 17 Years

Halifax Woman Gave up Hope and Is Soon Restored To **Health by Tanlac**

"Honestly, I don't remember single day during the past seventeen years that I could say I was well, but since I have taken Tanlac I fee twenty years younger," was the statement made the other day by Mrs. Mary Brunt, who lives at 865 Parr Mary Brunt, who lives at 865 Parrington St. Halifax, N. S.

'For seventeen years I had been troubled with indigestion," contained Mrs. Brunt, "and had fallen off un-

I weighed only ninety-three pounds and had given up all hopes of ever being rkl of my troubles. Often I would give way and faint purely from weakness, and I was so that I would be in bel two almost no appetite at all and it seem ed that no matter what or how lit-tle I ate I couldn't retain it. In just a few minutes after I had eaten anything I would feel sick at my stomach and at times I went for months hardly able to keep a bite of food down and was continually belching up a sour liquid. Most of the time all I ate was a small piece of dry toast and a cup of tea, but even this would come up again, in fact, I couldn't retain even a dose of medicine. I was troubled with terrible headaches and my nerves were in a dreadful condition, and night after night I would hardly close my eyes at all. I tried every medicine and treatment I knew of and to say I was discouraged wouldn't begin to express it. Not long ago I spent six weeks in a hospital and although I felt better while was there, as soon as I came out it was the same old story en took a trip down to Boston and

ough the New England States, Resents Insult of Colleague help me but all the time I just kept getting worse and worse.

"A neighbor of mine had taken

Tanlac and it had done her so much good that she persuaded me to try it, but I will admit I took it more to eau, M. L. A., for Sunbury, who sits please her than anything else, for at the right of the Speaker, is dismedicine. I am certainly glad now that I took it, for before I had finished my first bottle I began to improve and by the time I had taken my fourth bottle I was feeling so fine I could hardly want to feel any better. I have a splendid appetite and for the first time in seventeen years I am able to eat a good meal and enjoy it and already I have gained seven pounds. I can retain everything I eat, for it digests perfor Sunbury, jumped to his feet to I feel better than I have in twenty my nerves are so steady that I can sleep all night long like a child, I am perfectly delighted with the way "Tanlac is sold in Newcastle by J. J. Morris and in Redbank by

Club-Root of Turnips Cabbage Etc.

Club-root of turning and related plants causes a considerable loss in the eastern provinces. Diseased roots are greatly swollen, distorted and sometimes rotted. Once estab-lished the disease remains in the soil indefinitely unless precautionary measures are taken.

CONTROL practices are adopted the disease can be greatly reduced if not completely controlled:—

(1) Plant only on disease free soil

—A comparatively new piece of land wh'ch has never been planted with turnips, cabbage rape, etc., and which hence may be regarded to be absolutely free from the disease is a field which has previously produced club-root infected crop unless it has seen heavily limed and the l'me has had three or four years in which to the soil of the organism.

(2) Liming is a good practice-Constierable benefit may be secured by applying three tons of air slaked lime or five tons of ground limestone any time before panting the crop; but the best results are obtained when the lime is applied immediate ly after the diseased crop has been harvested and a period of three or four years allowed to elapse before turnips or cabbages are again plant-ed Liming will not only control club

ed Liming will not only control club root but turnips and cabbages do better on soils rich in lime than where time is lacking. Acid reacting fertilizers encourage the disease.

(3) Manure:—Manure from stock fed on club-rooted turnips should not be used as it thvariably carries the disease and infects the soil to which it is applied. Where possible it is good practice to apply to the turnip erro only such manure as comes from reaches where turnips have

MENS HATS

Criminals Like Smart Clothes. A world upside down, or, at any rate, not cortainly right side up, of fees continual surprises. Nothing is quite like it used to be and much is more kingly different. So you read that in the dock at the Central Crim-inal Court in London one frequently sees the latest fashions in men's and

women's wear.

"It is," says a writer in the London Daily Mall, "a sign of the times.

"Twenty years ago the average crimmal was ill-educated, ill-mannered, and slovenly in appearance. To-day many thieves, men and women, are intelligent, punctilious in be-havour, and dressed in the height

'Recently a notorious West En sharper, confident that the jury would acquit him, ordered his motor-car to be ready to take him home! It was a sad blow to his dignity and prestige when some one else ordered Black Maria for him.

"The modern criminal who infests the West End craves for the best of everything. He dines in the best restaurants, drinks the most expenrestaurants, drinks the most expensive wines, smokes the choicest cigars, and makes love to pretty women. His clothes are faultless in material and style.

"And among the women 'crooks' are just as fastidious. Parisian gowns cover them; rare jewels adorn

wit earry them anywhere. They all spend money as freely as a war profiteer. One woman—a clever jewei thief—appeared in the dock wearing a dress for which she had paid 70 guiness. Her £300 fur coat had been stolen by another thief, otherwise, no doubt, she would have worn that in

"Thieves have been making enormous profits. Furs, clothes, cigars, and jewels to the value of hundreds of thousands of pounds have been stolen during the year, and they have been sold again at practically their full market value. Beceivers—the people to whem thieves dispose of their beek—williams pay high prices for all band of waring appared because, eithered by waring appared because, eithered by the politic in electing me last year Mayor by acciamation, and would respectfully ask a continuance of your confidence in the present election, with the assurance that, if elected, i will use my best efforts to furthered will have despreaded, my also a track ale, but the second stream is always a construence of the town. Thieves have been making enor-
