Tea Troubles.

LONDON, April 11 .-- The opinion freely expressed here is that the proposed duty of 10 per cent on tea imported into Canada from countries other than those where it is produced, is ill-advised and bears the marks of unfriendliness to England. Canadian Pacific influence, it is said, has been a potent factor in shaping that feature of the revised Dominion tariff, and that it was that corporation which suggested that duty in order that it might have a monopoly of the carrying trade through its direct steamship connection with the east. In three years it is estimated the exportation of tea to Canada was 18,000,000 pounds weight, the value aggregating £800,000. The decision of the Dominion Government is awaited here with no little anxiety.
