THE BUSH FIRES. The following petition was received at the city council last night from residents of the townships of Dalton and Rama: That a dreadful bush fire occurred on the 31st August last, sweeping across your petitioners' farms, laying waste the country and destroying everything in its path, in-cluding your petitioners' savings of the past years, and leaving your petitioners homeless and in many cases wholly destitute, they only escaping with their lives and the bare

clothes upon their backs.

That your petitioners are therefore left in such a position that both fathers and sons must proceed at once to work in order to obtain the means of supporting their families during the coming winter. The petition went on to say that none of the preperties were insured, and asked for a grant of money to assist them in purchas-ing seed wheat. Appended were the names of fifteen families who had suffered by the

Organt Necessity for a New Engine —Serious Co sequence of a Breakdown—The Matter Dis-onssed in the Council Last Night.

Yesterday at the meeting of the executive

Yesterlay at the meeting of the executive committee the engineer's report as to the necessity of a new engine to cost \$100,000 was anomitted. Its contents have already been published in The World. He also recommended that the capacity of the mains on Front street between Simcoe and Church, nd on King street between Simcoe and

Jarvis, be increased. It was decided to lay the reports before the council recommendation.

When the matter came up in council last night, Ald. Baxter said there was a great deal of force in what the engineer said but at the same time it would be impossi ble to raise the amount this year, and he was sure the citizens would never vote for a dollar's expenditure on the water works until pure water was supplied to them. He moved that the matter be referred back to the committee for further consideration. By the time they got pure water and the citizens were in the humor to allow themselver to be taxed for additional expendiselver to be taxed for additional expenditure they might make preparations to have the by-law voted on next year.

Ald. Walker thought the question of the mains on Front stages should be at-

ferred for one week. He thought there was no course but to face the people, and inform them of the importance of the matter. He could not conceive of anything more serious than that the water supply of the people should be cut off. But as the matter was somewhat sudden to many of them, he would suggest that it be one sidered at the next meeting of the council. Ald. Hallam supported the amendment of Ald. Boswell. Ald. Davies thought more economy might be used in pumping, and proposed that they should advertise for tenders for additional pumpi g power. Ald. Bousted modified his motion so as to make it one simply referring the matter back to the water-works committee, which motion was carried.

LABOR NOTES.

The trial of last week was to settle this anomalous state of things. The appeal was to the standards, and the fight was a fight about the Methodist standards. Mr. Roy's position and Mr. Roy's panphlet came in for a good deal of consideration. The proscention included a great deal in what they regarded as standards, while the defence insisted that the only standards to which appeal could be made were included in "The Articles of Religion." And if this view of the case could have been successfully maintained Dr. Thomas must have been acquitted. Dr. Willing, who presided at this trial, maintained the dignity of an impartial judge. On the whole, the trial was conducted with a grave earnestness that meant business; although when I see

INSURANCE

NON-FORFEITABLE LIFE INSURANCE

THE ÆTNA LIFE INS. CO. first introduced its Non-forfeit. public in 1866. Previously thereto the universally prevalent objection to a man's insuring his life was found to be: "Oh, yes, it is all very fine so long as one can pay his premiuma, but when unable to pay more he loses all he has paid." And then would follow instances of neighbours cruelly robbed in this manner, after paying 5, it or 20 years. Not so, however, with the ÆTNA'S NON-TORINTABLE POLICIES, we asswered: and so fair a system soon commended itself, and the ÆTNA'S policies became popular. Some of their features have since been imitated by other companies, but it is an undeniable fact that no policy is more highly esteemed throughout the Dominion by those fortunate enough to hald them, than those of the ÆTNA LIFE. Every ÆTNA policy now being issued in Canada contains a most liberal non-forfeiting feature, besides having its entire Reserve, or Re-Insurance Fund, annually and permanently deposited with the Finance Minister af Ottawa.

Strikingly the reverse of this liberality to persons unable to continue is the

Strikingly the reverse of this liberality to persons unable to continue is the Tontine system, as it out-Herods the worst features of the old confiscating system previously practised in Canada. "But," it is said in its favour, "some cure is needed for the bad habit of letting policies lapse, and the Tontine system supplies it by giving NOTHING to those who drop out, and to those who remain their 10, 15 or 20 years, giving greater results than are obtainable on any other system." IN A PREVIOUS ADVERTISEMENT we have shown how mistaken was the representation of "greater results," when compared with the Etna's Nonforfeitable Endowment Bonds, and the following figures will afford proof that the other claim made—that it induces people to hold on to their policies—is equally groundless. They are from Paof. Cherriman's Insurance Reports, and relate solely to Canadian business transacted during the past three years:—

Members in good standing, Dec. 31st, 1877. 6,622 2,338 and 1,126 2.308 wontrants, less deaths, in 1878-79-80. 2,754 1,237 712 1,348 Members in good standing, Dec. 31st, 1880.... 8,460 2,423 1,139

From which it is plain that the two other companies increased their modulership in three years by only \$6 out of a possible 2,145—a little over 4 per 109 t

During the same time the ÆTNA LIFE, with nearly 9,000 exposed to labee,
increased its membership by 1,238 out of a possible 2,754, or about 67 per 109 t

The difference in favour of the ÆTNA LIFE'S Non-forfeitable System is
very gratifying. It shows that when people are free to go or to stay, they prefer to stay with a good company; and that when they find their polities good
for nothing if they stop paying, they are seventeen times more likely to pay no
more.

All the ÆTNA'S Endowment Policies are Nonforfeitable after two Annual syments, and all its Life Policies are so after three. For further particulars apply to
