MINERAL WATERS.

THE

WAUKESHA, WIS.

Nature's remedy for all diseases that afflict the Kidney, Bladder, Urinary and Generative organs. It has only to be tested in the above diseases to insure it a higher place as a remedial agent, than that now occupied by any of the justly celebrated mineral waters of the world.

Its cures of Kidney and Urinary diseases are most wonderful. By a practical demonstration of its effects, together with microscopic examinations and chemical analysis, several of which I have personally made; in my opinion the GLENN MINERAL WATER will in many cases do that which medical science now fails to do. T. D. WILLIAMS, M.D., CHICAGO, ILL. 89 Aberdeen St.

In my experience with natural spring waters for the past twelve years, I have never seen any water act so happily on the kidneys and urinary organs as the Glenn. I have sold a greater variety of natural waters than any one else in the United States, and from what I learn of their medicinal action, am convinced that the Glenn Water stands at the head of the list for all wrinary acturers. JNO. SULLIVAN, M.D., diseases. JNO. SULLIVAN, M.D.,

The GLENN MINERAL WATER is prescribed by all physicians who have tested its merits.

Beware of imitations and so called Mineral Water from Waukesha, as it has been practically demonstrated that there is no water in Waukesha equal or like the GLEEN MINERAL WATER. Invalids or others who have used any o the so-called Mineral Waters from Waukesha, are earnestly requested to give the GLENN MINERAL WATER a trial, and

This WATER will be found unequaled as a delicious table water, also when used with wines and liquor.

In families using this water as a beverage, Bilious, Malarial or Yellow Fever will be unknown, as it is not only of great benefit in such fevers, but a preventative. Send address and receive circulars with testimonials from parties in every State in the Union.

SEWING MACHINES.

THE SEWING QUEEN. From out all nations around her there drew,
The fair and lovely, the honest and true,
Greatly admiring this fair, royal one,
And loudly praising the work she had done.
There were Hems and Fells and Scallops all bout
And Ruffles and Tucks all Braided around,
And Cords that were laid as straight as a line;
Others were curved, and some serpentine;
Embroidery too - there was every shade—
And Scams as heavy as ever were made!
They gazed with delight, as she whirled around
So Light and Easy, with saarcely a sound.
Her speed was terrific—she never grew tired;
They verily thought she must be inspired.
Her Thread was double, and her stitch a lock,
Her work, so perfect, was all of their talk,
And sweetly they sang—in a grand refrain—
Lauding her merits—sqain and again.
Who is this fair one—so noble and grand—
That calls forth euch praises on every ham?
For all who had heard, and those who had seen,
Were anxious to learn the name of this Queen.
When, lo! there appeared in resplendent fame
A golden halo from that Goddess—Fame—
Inclosing the words "Light-Running Domestic !"
This is the name of the Queen majestic.

M. HILTON WILLIAMS, M.D., PROPRIETOR.

All diseases of the respiratory organs treated by medical inhalations, combined with proper constitutional remedies.

Ozen a is the professional or technical name given to an advanced form of catarrh in which ulceration has eaten through the membrane lining of the nose to the cartilage of the bone. Any case of catarrh may end in ozene, but it most frequently occurs in those who are naturally scrofulous. The discharge takes place through the nostrils or through the throat, and is generally of a yellowish or greenish yellow color, frenquently tinged with blood, and hlmost always atten red by an offensive smell. In the language of Dr. Wood, of Philadelphia, "the disease is one of the most obdurate and disagreeable which the physicians has to encounter. In bad cases the breath of the patient becomes so revolting as to issolate him from society, and to render him an object of disgust even to himself."

In some instances pieces of bone become separated and though off, leaving deep, unhealthy ulcers, which secrete a blood matter, and are extremely difficult to heal.

In some instance; pieces of bone economic and though off, leaving deep, unhealthy inters, which secrete a blood matter, and are extremely difficult to heal.

After Ozema has continued some time the sense of smell usually becomes impaired and often lost.

Deafness is one of its most common consequences and results from its extension through the custach, ain tubes to the internal ear.

Pains in the head and over the frontal sinuses, impring memory, and even insanity, frequenty spring from its extension to the brain.

The greatest danger, however, because the most common, is that it will extend downward and affect the lungs. In most cases of pulmonary disease catarrh is present in some degree, and in many instances it causes a large share of the patient's discomfort.

Besides these grave consequences, all of which are liable to spring from scrofulous catarrh or Ozema, there are others which, if less dangerous, are sufficiently unpleasant. It occasions great unhapiness to thousands of both sexes, by isolating them and preventing their settlement in life. An offensive running from the nose, with foul breath, is about as great a calamity as can befall young people.

The treatment of this disease requires much care and perseverance to conduct it to a successful issue. The _remedies must be carefully adapted to the stage of the disease in each case, and applied directly to the parts affected, which may be done by the patients themselves, whereever they may be, and without hindrance to their daily occupation.

I have seen so many of those cases saved by inhalation that I cannot doubt its curative powers or regard any case necessify hopeless unless both lungs are extensively involved. The great vitue of inhalation in the treatment of all head, threat and ung complaints has been indorsed by all the leading medical journals of England, France and Germany. If possible call personally for consultation and examination, but if impossible to do so, write for a "List of Questions" and "Medical Treatise." Address

pening of the Arguments by Counsel Yesterday WASHINGTON, Feb. 3.—The arguments on Sco-ville's application for a new trial were heard to-day. The court-room was crowded as usual and all of the rymen were in attendance, and listened attentive ly to the proceedings. The assassin took in \$20 by ly to the proceedings. The assassin took in \$20 by furnishing his autograph at 25 cents each. There is no telling but that another protracted enquiry will be had. The assassin was rather mild in his behavior, and only made a few interruptions. He sat beside Scoville at the table. Some very damaging statements were made against the character of Snyder, the person who alleges that he found the Critic newspaper in the jury-room with the names on. Corkhill read affidavits of each member of the jury positively denying ever having seen or read a copy of the Critic or any other paper during the trial. The arguments of counsel were continued until 4 p.m., when the court adjourned until to morrow.

MILITARY DRAMATIC ENTERTAIN-

The Tenth Royal Grenadiers' dramatic entertainment in the Graud opera house Monday night next promises to be an unqualified success. It is under gubernatrial patronage and will draw the wealth, beauty and fashion of the city. The military comedy of Ours will be pesented with the following caste: Col. Sir Alexander Shendryn, Capt. Robertson; Hugh Chalcot, Capt. Manley: Capt. Angus McAllister, Mr. Paterson; Prince Petrovski, Dr. Ryerson; Eleut. Samprey, Mr. Howard; Sergt. Jones, Mr. Percival; Lady Shendryn, Mrs. Marlowe; Blanche Haye, Miss Craig; Mary Netley, Miss Maggie Clarke. The ladies in the caste are talented professionals, and of them Mrs. Marlowe is sure of a warm welcome to her old place on the stage of the Grand. All the gentlemen are amateurs, but if they acquit themselves in the play as creditably as they do in a review they will do well. The piece will be elegantly mounted and a detachment of the Grenadiers will appear in the second act. The regimental band and an efficient orchestra will supply the music.

Messrs. Frankish, Gibb and the warden were appointed as representatives at the Industrial association yesterday. The committee on printing recommended that the contract for printing be awarded to Moore & Co. This was amended by substituting Corson & Yon, Markham. The property committee recommended that the telegraph companies be compelled to remove brush which was left on the road-side by their employees; that the gas company be compelled to put the roadways in proper repair after the laying down of pipes; that the county commissioners purchase a gravel pit; that the lake shore road be repaired; that toll-gate No. 1, lake shore road, be supplied with water; all of which was adopted.

The want of an independent press appears just now to be one of Manitoba's weak points. Somehow or other nearly all the journals of that province have a muzzled air about them—somebody has tied them up. Whether it is the Pacific syndicate that has bought them or that their cardiators. has bought them, or that their conductors are in-terested in land speculations, or for some other un-known cause, yet it is the fact that they have very little to say of railway monopolies, and less of land regulations and the acquirement of great tracts of

PULLMAN CAR FRAUDS.

MONTREAL, Feb. 3.-The principal witness excompany. He produced an order signed by Mr. Clark, the former superintendent here, cautioning the conductors and other employee against bringing roods in from the States surreptitously on pain of dismissal. This order witness stated had been acted on and men were dismissed for not obeying it. The order was a standing one up to the present. The company assigned twenty-nine cars for use in Canada. All were built here. The contracts between the company and the government were read, which showed that the cars came in under bond and were not required to pay duty. These cars were under control of the government on the Intercolonial road, the o mpany merely getting the fares collected. The question of duty was ratsed when the first car came in, but was settled without any payment being required. The commissioners asked the representatives of the company for full returns of the goods and packages brought in without duty, and also a list of cars sent out for refitting and brought back without entry at customs. These returns were promised and enquiry adjonned.

Lady Knocked Down Twice and Badly Injured By a Reckless Skater. Mrs. Fitzgerakl, a teacher in Dufferin school, was badly injured at Moss Park rink on Thursday night by the culpable recklessness of a skater. She was on the rink in company with her little boy, whom she was teaching to skate, when the individual in question, who was skating backward, ran into her and knocked her down. This might have been a warning to him that fancy skating was not his forte, but it evidently made no impression on him. He apolegized to the lady and assisted her to rise and in a short time was sailing recklessly round the rink backwards. The result was that Mrs. Fitzgerald was again knocked down by the same individual, but this time with more serious consequences. She was seen to be suffering great pain and to be unable to rise, and several other skaters, including the author of the mischief, carried her into the ladies' room! A carriage was procured and she was taken to her home on George street, where it was found that her leg was broken in two places below the knee. She passed a restless hight, but was somewhat better yesterday morning.

Complaints have been made before of the reckless conduct of the man who caused the accident.
