Why Water Llilies are Pink and Fragrant. The American water lily has become sweet-scented in something like the fashion plant growth—nitrogen, phosphoric acid am going to describe. When the rose and potash—Canada finds within her own chafers and water-side insects flit from one | bounds ample supplies of the two latter in lily to another, in search of the honey the vast phosphatic deposits of Ontario secreted by the petals, they carry pollen— and Quebec, and in the wood-ashes pro-the yellow dust you know so well in the duced in the clearing up of new country, center of many flowers—from one blossom while nitrogen is supplied by swamp an to the next they visit. Now this pollen is marsh mucks. necessary in order to make the seeds swell Wood-ashes are the mineral inorgan and so to keep up the supply of water lilles constituents of plants which they, during from one generation to another. The best crossed; that is to say, when pollen from one blossom is dusted over the tiny unripe fruits of another. The beetles and other development in the proportions that they require for the building up of their tissues.

require for the building up of their tissues.

pocket and all under your pillow, and you should be performed in early spring before will not be likely to leave either. The best if not entirely secure fastenings of your chamber door is a bolt on the inside; if there is none on, lock the door, turn the key so that it can be drawn partly he begins to gain strength from this food it

History of 15 Years.
For fifteen years we have used Dr. Fowler's Extract of Wild Strawberry as a family medicine for summer complaints and
diarrhea, and we never had anything to
equal it. We highly recommend it.

Samuel Webb, Corbett, Ont.

It saken away and the supply of meal and ground meat increased. Toward the last of the fattening he gets meal and milk exclusively. The idea is to first build up the bird in growth and then to add the flesh.

Rapid growth makes the best meat.

Agricultural.

Of the three materials indispensable f

seeds are produced when the flowers are If, therefore, we return to the soil such

plant; they only go, hungry creatures that wood ashes is potash—the secondary ele plant; they only go, hungry creatures that they are, to get honey for the satisfaction of their own greedy appetites; but as they rummage about among the pretty flowers, they dust themselves over unconsciously with the pollen, and then they fly away and rub it off on the center of the very next lily they change to light upon.

wood ashes is potash—the secondary elements of value being lime and phosphoric acid. The crops especially benefited by an application of potash, are clover, peas, and other leguminous plants, potates; and other leguminous plants, potates; and other legating plants. The value being lime and phosphoric acid. The crops especially benefited by an application of potash, are clover, peas, and other leguminous plants, potates; and other leguminous plants, potates; and other legating and Friday, connesting at Yarmouth for Boston every wednesday and Saturday Evenings, after arrival of the train of the Western Counties Railway. Returning, will leave a rail to the value being lime and phosphoric acid. The crops especially benefited by an application of potash, are clover, peas, and other leguminous plants, potates; with the pollen, and then they fly away and rub it off on the center of the very next like the pollen, and then they fly away and rub it off on the center of the very next leguminous plants, potates; and other legating and rub it off on the center of the very next leguminous plants, potates; and other legating and rail to the train of the Western Counties Railway. Lewis' Wharf, Boston, at 10 a.m., every more acid. The crops especially benefited by and Saturday Evenings.

and rub it off on the center of the very next lily they chance to light upon.

Well, I need hardly tell you then that the lilies which succeed in attracting the greatest number of insects to themselves will also set the greatest number of seeds, and so will be likely in the long run to outlive their less attractive fellows in their children's children. So if any lily happens to possess any faint perfume, however indirectly as a fertilizer. By their use the mouth with train for Halifax and Intermediate stations. The YARMOUTH carries a regular mail to and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia and from Boston, and is the fastest Steamer plying between Nova Scotia to possess any faint perfume, however slight, which helps to draw upon it the lith of sandy soils may be much improved, notice of the beetles, it will be pretty sure for by virtue of their contained potash the to secure a greater number of these uncon-scious allies, and therefore to succeed better,

than the scentless lilies. In some such way,

1 take it, the go-ahead blossoms of your

Canada takes a front rank, yet it seems American ponds began to develop a faint necessary to impress the value of their us perfume; and as, when once the ball was for home consumption upon our agriculfairly set rolling, those lilies in each generation would be most likely to succeed which possessed the most delicious perfume, the end of it all is that your American kind in the home market. Notwithstanding this are now all exquisitely scented, while our fact, the sale of ashes for agricultural purstick-in-the-mud old European type has poses in Canada is very limited. It is to stuck to the original ancestral pattern, and the lighter soils, in the older sections of this country, where cultivation for many nething of the same kind, no doubt, years has exhausted considerably the store also accounts for the prevalent pinkiness of of potash, that the benefit from a dressing of wood-ashes is reaped.—Prof. Saunders,

Turkey Talk. white as ours are. But in some other ponds | Nearly all writers say that to make the lilies are quite distinctly pinkish; and turkey raising profitable the birds must at Barnstable in Massachusetts they are have special care. 'The hens must be care rosy red, or sometimes even almost crim- fully set and handled and the young have son. Here, I suppose, we catch the insects cooked eggs, milk and many other delicate actually at work; their preference for the foods because they are very tender. They pretty pink flowers over the pale white must be kept confined for the first three or ones has only just begun to affect the color four weeks and after all this labor and cost, in some places, but not in all. As time very taxing to the mind, many of them are goes on, I have very little doubt, the lost, which makes the profit quite slim. beetles will more and more prefer the pink, But I have raised turkeys for three years until at last the white are left entirely un- and find them less trouble than chickens visited, and, never setting their seed, must The first I hatched under common fowls. in the end die out altogether. If I should I kept them in mornings until the dew was visit America again in another couple of off, when they were turned out. 1 fed them LIME AND SALT thousand years or so, I shall confidently a few days on corn meal dough, then wheat expect to find all the big water lilies pink screenings only until they were half-grown or red, and never a white one left anywhere. and I did not lose one. The next spring I There are indeed some kinds in other parts sett the eggs under turkey hens, using policy of the world which have already passed care in going about them for fear they through this stage of evolution, and are would not sit well. They each came off with a nice gang. I paid no attention to them, let the hens take entire charge, never fed them and not one drooped or died. In Jannary I sold them at a nice little profit. Let reprive one of my hens. now rose-color, blue, or scarlet.—Grant with a nice gang. I paid no attention to

The Kousehold.

table fibre, albumen, sugar, gum, ophyl malic acid, gallic acid, lime, deflorophyl malic acid, gallic acid, lime, and much water. Furthermore, the German analysts say that the apple contains a larger percentage of phosphorous than any other fruit or vegetable. This phosphorous is admirably adapted for renewing the essential nervous matter, lethicin of the brain and the spinal cord. It is, perhaps, for the same reason rudely understood, that old Scandinavian traditions represent the apple as the food of the gods, who, when they felt themselves to be growing feeble and infirm, resorted to this fruit for renewing their powers of mind and body. Also the acids of the apple are of signal use for men of sedentary habits, whose livers are sluggish in action, these acids serving to climinate from the body noxious matter which, if retained, would make brain heavy and dull, or bring about jaundice or skin eruptions and other allied troubles. Some such experience must have led to our custom of taking apple sauce with roast pork, rich goose, and like dishes.

Gerard found that the "pulpe of roasted apples "Yas, sah. Ain' you dun seed me cross the control of the contr mixed in a wine-quart of faire water, and labored together until it comes to be as "Yas, sah. Ain' you my heart?" "De lady dnn gone?" apples and ale-which we call lambeswool never failed in certain diseases of the raines, which myself hath often proved, and gained there both crowns and credit."

"The paring of an apple, cut somewhat thick, and the inside whereof is laid to hot burning or running eyes at night when the party goes to bed, and is tied or bound to late the transfer of the party goes to bed, and is tied or bound to late the transfer of the party goes to bed, and is tied or bound to late the transfer of the party goes to bed, and is tied or bound to late the transfer of the party goes to bed, and is tied or bound to late the transfer of the party goes to bed, and is tied or bound to the same, doth help the trouble very speedily, and, contrary to expectation -an ex-

very common use in Linconshire for the where on use cure of weak or rheumatic eyes. Like ing as a specimen:

A farmer's wife bustled into a store in Penobscot county the other day, and went wise, in the Hotel des Invalides at Paris, an apple poultice is used commonly for inflamed eyes, the apple being roasted and its pulp applied over the eyes without any intervening substance.—London Hospital.

"Mr. B.—, I bought six pounds of sugar here last week, and when I got it home I found a stone weighing two pounds in the package."

"Yes, ma'am."

"Yes, ma'am."

"Yes, ma'am."

"Can you explain the swindle, sir."

"I think I can," was the proprietor's placid reply. "When I weighed your eight pounds of butter, week before last I tound a two pound pebble in the jar, and when I weighed your sugar the stone must have slipped into the scales, somehow. We are both growing old, ma'am, and I am sorry to say that our eyesight isn't to be trusted. What can I do for you to-day, ma'am."

"Yes, ma'am."

"Can you explain the swindle, sir."

"I think I can," was the proprietor's placid reply. "When I weighed your sugar the stone must have slipped into the scales, somehow. We are both growing old, ma'am, and I am sorry to say that our eyesight isn't to be trusted. What can I do for you to-day, ma'am."

Too many fond but foolish mothers find, too late, that by neglecting to train their children to systematic working and playing children to systematic working and playing hours, they have brought on them untold suffering in their after-struggle with the world. The failure of half the overworked THE subscriber has lately established business in the premises known as the PAYSON PROPERTY, first door east of the Post Office, where he intends to conduct the Meat and Provision Business in the best style, and so as to meet the requirements of the Daughters who are brought up to share Meat and Provision Business in the best style, and so as to meet the requirements of the trade in ail particulars. By strict attention and by dressing the best of stock, he hopes to receive a liberal patronage.

do hard work. That total exceptional position in life where they have

is no satisfaction in life more real than that which arises from the sense of duty well performed, and no misery more intense than the sense of duties pressing which one is powerless to meet —N. Y. Tribune.

—To make raspberry jam, weigh equal proportions of fruit and sugar, put the fruit in a preserving kettle, with a little currant juice, one pint to six quarts of berries, mash the berries as they cook, using a silver or wooden spoon. Let it cook well before adding the sugar. after which than the sense of duties pressing which one well before adding the sugar, after which

well before adding the sugar, after which boil 10 or 15 minutes.

While raspberries are in season no one should fail to make raspberry shrub, to use for a summer drink. Pick over black raspberries; if they need washing, put them in a sieve and let water run through them, the less the better. Let them stand over night in a stone jar covered with good cider vinegar. Next morning mash them well and strain through a bag, not your jelly vinegar. Next morning mash them well and strain through a bag, not your jelly hag, as the vinegar will injure it; measure the juice and add three-quarters of a pound of sugar to each pint; boil 10 minutes and bottle while hot. For use, put a spoonful or two in a glass of water. "This is one of the most useful preparations that can be kept in a house, not only as affording the most refreshing beverage, but being o singular efficacy in complaints of the chest."

—A schoolteacher near Dawson, Ga., having instructed a popil to purchase a grammar, the next day received a note thus worded, from the child's mother: "I do not desire for Lulu shall engage in grammar as i prefer her ingage in yuseful studies and can learn how to spoke and write properly mysely. I have went through two grammars and can't say as they did me no good and vokal music on the piano."

RAISIN PIE.—One pound raisins, boil one hour, keep covered with water, juice of one lemon, two eggs, three spoonfuls of flour, one cup sugar. This will make three pies.

ECONOMY IN MATRIMONY.—"You are not as liberal as you were before we were married, George. You used to order wo portions of strawberries and cream and now it is only one."

"Well, that's proper. We used to be two, but we are one now, ain't we?"—
Chatter.

PUMPKIN PIES .- One pint of cooked ampkin, one teaspoon of ginger, one cup

of sugar, two cups of butter, two cups of cream, and two teaspoons of saleratus; stir well and mix to a stiff batter.

-There is a decided difference between There is a declared difference wind tight coop for young hicks. Some farmers don't seem to know he difference, but the chicks do.
