HIS LIFE RUINED BY DYSPEPSIA

Until He Tried "FRUIT-A-TIVES" The Wonderful Fruit Medicines

MR. FRANK HALL

Weyvale, Ontario.  
 "For some two years, I was a sufferer from Chronic Constipation and Dyspepsia. I tried every remedy I heard of without any success, until the wife of a local merchant recommended 'Fruit-a-tives'. I procured a box of 'Fruit-a-tives' and began the treatment, and my condition commenced to improve immediately. The Dyspepsia ceased to be the burden of my life as it had been, and I was freed of Constipation. I feel that I owe a great debt to 'Fruit-a-tives' for the benefit I derived from them."

FRANK HALL.  
 50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

THE HOUSE CAT

(By Dr. A. K. Fisher)

Many an innocent hawk, skunk, owl and weasel has been shot for the deed of that sleek highwayman, the house cat. It is safe to say that this marauder, which enjoys all the comforts and protection of a home in the more thickly populated districts destroys in the aggregate more wild birds and young poultry than all the native enemies combined. A cat has been known to kill a whole brood of chickens in a day, a feat unequalled by any other predaceous animal with the possible exception of the mink. Others in the course of a season have destroyed whole covies of quail or grouse; or nests full of young songsters. A well known naturalist estimates that in the New England States alone one and one half millions of birds are destroyed annually by cats. The offender is not so often the well fed household pet as it is the abandoned and neglected outcast known as the woods cat or "wild cat." In 1905 the Society for the prevention of cruelty to animals in New York City killed monthly an average of five thousand sick, injured or homeless cats. A total for the year of over seventy thousand. A considerable proportion of these were pets abandoned by people who had gone to the Country for the summer. Morever summer visitors in the mountains or seashore sometimes take with them their cats, which on their return home are too often left behind to swell the local overflow and make serious inroads on the birds of the region. It is safe to assume that in the rest of the State outside New York City as many cats follow a nomadic life as in the city, and if we assume that each cat kills one bird a week, we have a grand total of over three and one half millions of birds destroyed annually. In the milder parts of our country as in the chaparral region of California where bird life is abundant, cats often revert to a semi wild state and never revisit their old home except for plunder. Sportsmen and bird lovers should be ever watchful and when ever possible remove marauding cats from the coverts. The principal reasons given for keeping cats are their attractiveness as house pets, their usefulness as companions for children, and their alleged value as rat and mouse killers. It is impossible at present to obtain correct figures on the subject, but it is safe to say that few persons during a normal lifetime run across more than half a dozen cats which habitually attack rats. Occasionally a hunter cat is found which seems to delight in catching rats, Gophers or Ground Squirrel. It is a common experience however, to find premises well supplied with cats overrun with rats and mice. At a certain ranch house in the West a member of the Biological Survey trapped in his bedroom twelve mice in a week, although eight cats had access to the place. Lovers of the cat should be content with one, or the most two, of these pets and should see to it that outcasts do not run at large on their premises. Now that cats are known to carry in their fur the germs not only of ring worm, but also of such dreaded diseases as tuberculosis, diphtheria, scarlet fever and smallpox, and fleas and ticks which transmit bubonic plague and spotted fever, the presence in the household of Tabby is not without its dangers.

Salvation Army officer dead  
 From Toronto comes the sad news of the death in that city of Adjutant Kate W. Ritchie, of the Salvation Army. She was a daughter of Mr. and Mrs. Wallace Welch, of Westport, Digby county, and in early life was a successful school teacher. She attended the Salvation Army training school in St. John and served in the Rescue Home in Halifax. She was stationed at Truro, Springhill and Sydney and afterwards opened the Salvation Army work in Bermuda, where she served three years. She went to Fredericton, Sault Ste. Marie and to Newfoundland where she met and married Ensign Allen Ritchie, of Dartmouth. They attended the great world's carnival in London, then returned to Newfoundland and back to Ontario where her health broke down and she died in a Salvation Army rest camp at the age of 50 years, leaving her husband and four young sons to mourn.

KEEP LITTLE ONES WELL IN WINTER  
 Winter is a dangerous season for the little ones. The days are changeable—one bright, next one cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or grippe. What is needed to keep the little ones well is Baby's Own Tablets. They will regulate the stomach and bowels and drive out cold and by their use the baby will be able to get over the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

MAXIM THIBEDEAU  
 Thursday's St. John Telegraph says: In this city on Sunday, after a lingering illness, Maxim Thibedeau passed away in the seventy-fifth year of his age, leaving to mourn his wife, Mary, two daughters, two sons and one brother. The daughters are Mrs. Eddie White, of West Virginia, and Mrs. Thomas Wood of Everett, Mass. The sons are: Joseph of Nova Scotia, and George of the west side. The funeral will be from his son's residence, 95 Union Street, to the Church of Assumption this morning at 8 o'clock.

Wash black stockings in fresh suds and rinse in very blue water. The soles of shoes may be preserved by applying shellac. Bed springs given a good coating of aluminum paint will not rust. Floor cushions for foot-rests are very convenient under the desk, before the couch or divan and before the fire.  
 To prevent windows freezing at the bottom, spread a thin layer of fine salt on the sill beneath the sash, adding more salt when needed.  
 If ice cream sticks to the mould and refuses to slip out readily, put a towel wrung out of hot water around it a moment to loosen. Be careful not to apply the heat too long or the outside will be soft. Ink stains may be easily and quickly removed from the fingers by rubbing them with the head of a sulphur match which has been well moistened.  
 Rain spots on clothes can often be removed by placing a clean, damp cloth on the material and pressing it with a moderately warm iron.  
 When laundering schoolboys' soft collars, try putting a very small amount of starch in them. They not only stand up and look better, but they keep clean longer.  
 Wrinkles are the little furrows in which Father Time sows the seed of discontent with a lavish hand.  
 The owner sometimes discovers that C.O. mare makes the money go.

SUGGESTIONS FOR THE HOUSE-KEEPER

FATHER AND SON WELL AND HAPPY

"The way Tanlac Helped Us Is Simply Wonderful," Says Halifax Man.

"Nobody except those who have been through it can understand what I suffered before I got hold of Tanlac, said Richard H. Weeks, of 13 Cabot Place, Halifax, N. S.

"My stomach has been out of order for the past year or two, and my appetite got so poor that I had to force down whatever I ate. I was troubled with gnawing pains in the pit of my stomach and had sharp pains around my heart. After every meal I had a heavy feeling, like a dead weight in the pit of my stomach and felt miserable for hours. I had sick headaches with attacks of dizziness. I lost weight continually and hardly had strength and energy to drag my feet after me. My condition at one time got so bad that I had to give up work entirely for over a month. I went for days at a time without eating scarcely any thing and sometimes even the sight of anything to eat made me sick.

"I noticed an improvement before I had taken half a bottle of Tanlac. I am now on my fourth bottle, have a good appetite and eat three square meals every day. Everything agrees with me and I never have a touch of indigestion. I am not bothered by constipation or dizziness any more, have gained ten pounds in weight, and am working every day. Tanlac had done me so much good that I decided to try it on my little son who had been puny for years, and the way it has helped him has been certainly wonderful."

Tanlac is sold in Bridgetown by S. N. Weare in Middleton by Clifford A. Mumford, and in Bear River by L. V. Harris.

SALVATION ARMY OFFICER DEAD

From Toronto comes the sad news of the death in that city of Adjutant Kate W. Ritchie, of the Salvation Army. She was a daughter of Mr. and Mrs. Wallace Welch, of Westport, Digby county, and in early life was a successful school teacher. She attended the Salvation Army training school in St. John and served in the Rescue Home in Halifax. She was stationed at Truro, Springhill and Sydney and afterwards opened the Salvation Army work in Bermuda, where she served three years. She went to Fredericton, Sault Ste. Marie and to Newfoundland where she met and married Ensign Allen Ritchie, of Dartmouth. They attended the great world's carnival in London, then returned to Newfoundland and back to Ontario where her health broke down and she died in a Salvation Army rest camp at the age of 50 years, leaving her husband and four young sons to mourn.

MALAGASH SALT IN AGRICULTURE

During the past season experiments have been carried on by Professor Harlow of the Agricultural College, to determine the value of Malagash Salt as a fertilizer. The tests were carried on at Malagash, Tatamagouche and in Hants Co. At Tatamagouche a badly run out piece of land yielded 11 bushels of oats to the acre with an application of 200 lbs. salt. The check plot which had nothing applied yielded 7 1-2 bushels. A peice of ground in Hants Co. of higher fertility yielded 30 bushels with salt alone and 17 1-2 bushels without.

At Malagash one field had an application all over of Acid Phosphate. The plot which had Acid Phosphate only yielded 24 bushels oats to the acre. A plot to which salt was also applied at the rate of 200 lbs per acre yielded 33 bushels, while a third which received 300lbs. salt in addition to acid phosphate dropped to 21 bushels per acre.

Another Malagash field planted to vegetables gave the following returns:  
 Plot No. 1 fertilized with manure only, yielded 120 bushels of Potatoes to the acre.  
 Plot No. 2, with manure and 200 lbs salt yielded 96 bushels.  
 Plot No. 4 planted to turnips, manure all over yielded 192 bushels per acre more where salt was applied than with manure alone.

Too much stress ought not to be laid on one season's experiments. It would seem that the Malagash Salt is well worth trying out in conjunction with other fertilizer. Probably, except in very few cases, the application should not exceed 200 lbs per acre. Doubtless some areas will respond much more readily than others. It should be remembered that turnips, cabbage mangies and such crops seem to be fond of salt.  
 A full account of Prof. Harlow's experiments will be found in the Report of Secretary for Agriculture, which will be available in two or three weeks.

THE BAKER ESTATE

Yarmouth Herald:—We have been reading a lot lately about the Jacob Becker or Baker estate, and of the claims made by the heirs in this vicinity. E. B. Parker, of Bear River, was in town last week and he is of the opinion that the prospects of getting at least a quarter of this great inheritance are good.  
 He tells us that the Digby County heirs are from a well defined line direct from Samuel Becker or Baker (brother of Jacob) who came to this country on a vessel built by himself in Philadelphia and landed near Bear River at Waldeck, which he named. He spent the rest of his life there. The local association, according to Mr. Parker's statement, is almost complete on this one line and he thinks that now is the time they should demand their rights.

MOUNT ALLISON CAMPAIGN

The Kentville Chronicle says: "It is to be regretted that the Mount Allison campaign for half a million dollars has so far failed to reach the limit. Over \$300,000 was subscribed, and the balance is needed and will likely be gone after later."  
 Next time the "publicity manager" will find it more profitable to spend \$500 in newspaper advertising instead of sending out "Important Rush" dead head items to the poor country publishers, the majority of whom for at least once, failed to be wagram, and in this way a few of the more fortunate ones, got a half page adv. for one insertion. All similar campaigns during the past few years, properly advertised, have met with great success.

DIRECTIONAL STATION OFFICIALLY OPEN

ST. JOHN, March 2.—The new direction finding station of the Naval Service of Canada, radio branch, located at Red Head, was officially opened on Tuesday and from this time on will give a continuous service to the marines coming into the port of St. John. This is the fourth of these stations to be placed in operation by the department, the others being located at Chebucto Head, Canso and Cape Race.  
 The station is located at 45.15 North and 66.0 50 West.

LOOK FOR GRASSHOPPERS

REGINA, March 2.—A grasshopper outbreak in Saskatchewan this year is considered very probable. It is expected to prove more serious in the districts where the pest was reported last year for the first time, than in areas where they have been prevalent for a longer period, according to Hon. C. M. Hamilton, minister of Agriculture.

Minard's Linctment For Diphtheria.

YOUNG GIRLS NEED CARE

Mothers! Watch Your Daughters' Health

Health Is Happiness  
 From the time a girl reaches the age of twelve until womanhood is established she needs all the care the thoughtful mother can give.

The condition that the girl is then passing through is so critical and may have such far-reaching effects upon her future happiness and health that it is almost criminal for a mother or guardian to withhold counsel or advice. Many a woman has suffered years of prolonged pain and misery through having been the victim of thoughtlessness or ignorance on the part of those who should have guided her through the dangers and difficulties that beset this period. Mothers should teach their girls what danger comes from standing around with cold or wet feet, from wearing heavy articles, and from overworking. Do not let her overstudy. If she complains of nervousness or irritability on the part of your daughter, make life easier for her. She needs thoughtful care for a few years. In all such cases Lydia E. Pinkham's Vegetable Compound should be given as it is especially adapted for such conditions. It contains nothing that can harm and can be taken in perfect safety.

At the age of sixteen my daughter, she says: She had pains across her back and in her sides. Every month her back would pain her so she could not do her work and would have to lie down. My married daughter recommended Lydia E. Pinkham's Vegetable Compound and I read the books which were left at my door. She took it faithfully and it is now regular and has no pain. We recommend the Vegetable Compound to our newspapers. —Mrs. KATIE ECHES, 4064 N. Fairhill St., Philadelphia, Pa.

When I was thirteen years old I had sick spells each month and as I was very backward I would bear the pain and my mother knew nothing about it I read in the daily paper about Lydia E. Pinkham's Vegetable Compound and I took my own spending money and bought a bottle. It helped me so much have any more pain or backache and have been a healthy, strong woman. I am now 39 years old and have a little girl of my own, and when she gets old enough I shall give her none other than Lydia E. Pinkham's Vegetable Compound. —Mrs. C. E. WILLIAMS, 2437 W. Toronto St., Philadelphia, Pa.

For almost fifty years Lydia E. Pinkham's Vegetable Compound has been relieving women, young and old, of ailments peculiar to their sex. Ask your neighbor about it, for in every neighborhood there are women who know of its merits. Thousands of letters similar to the above are in the files of the Lydia E. Pinkham Medicine Co., and for years such letters have been published. Surely it is worth your while to make a fair trial of Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.
