

Sir Arthur W. Currie.

16th September, 1926.

- 2 -

is the actual cost per capita.

An analysis shows an increase of revenue of \$1,102.

As we are to have another meeting on Monday evening I should be glad to have your views on this matter. I think the proposed change is in the best interests of the College, and whilst we could probably only obtain $5\frac{1}{2}$ mills from Ste. Anne de Bout de l'Ile and Senneville this year, I should propose to make the arrangement for only two years, and then at the end of that period ask for a fresh contract.

Faithfully yours,

H. Hurson

Principal.

L.
