

The first buoy on the larboard hand coming in, is in 25 feet water.

The second buoy	"	"	"	"	"	19	"	"
" third	"	"	"	"	"	24	"	"
" fourth	"	"	"	"	"	24	"	"
" fifth	"	"	"	"	"	24	"	"

The first buoy on the starboard hand coming in, is in 19 feet water.

The second buoy	"	"	"	"	"	19	"	"
" third	"	"	"	"	"	24	"	"
" fourth	"	"	"	"	"	24	"	"
" fifth	"	"	"	"	"	24	"	"

The above named buoys are placed in the shoalest water in the channel, and on the edge of the banks which form the channel; and in no one case must a vessel stretch beyond the buoys on either side.

There is a true tide setting through the channel, the time of high water the same as at the Hook, viz. full and change 7h. 35 min.

The course in, after entering the channel, is W. N. W. by compass, until the Hook and Highland Lights are in range. Keep these in range, and run up for the Narrows, which will carry you clear of every thing.

To the northward of the black buoy off the Bar, the following spar buoys have been placed. Those on the larboard hand coming in, are black, with white tops; and those on the starboard hand, white, with black tops.

The 1st buoy on the larboard hand is in 31 feet water.

2d	"	"	"	"	"	24	"	"
1st	"	"	starboard	"	"	30	"	"
2d	"	"	"	"	"	24	"	"

The flood tide sets, first half, N. W., last half S. W. All the above depths are at low water.

The spar buoys at the entrance will be changed in the spring, and can-buoys, with the same marks will be put down.

Page 223.

POTOMAC RIVER.—A Floating Light is anchored on the end of the Bar that runs off Upper Cedar Point, on the Maryland shore, and her light was exhibited for the first time, on or about the 11th October, 1837.

Page 245.

ST. AUGUSTINE.—Two miles distant from the Island of Anastasia, and nine miles from St. Augustine Light, S. E. by S. from the light by compass, there has been recently discovered a fresh water fountain, about 100 feet diameter, appearing like breakers.

Page 277. Note.

NEW ORLEANS, Oct. 31, 1837.—In consequence of the injury sustained by the late gale in the machinery of the lighthouse at South Point, that light will be seen stationary until further notice.

Page 279. Note.

TIMBALIER ISLAND.—A lighthouse is represented to be erected on this island. This is an error; there is no lighthouse on this island.

#### ERRATA.

- Page 152. 8th line from bottom, in description of Portland Harbour, for "at the distance of 3,000 feet, read 300 feet.
- Page 148. 15th line from top.—Moose Peake Reach.—The course given is N. E. by N. It should be N. E. by E.
- Page 138. Note †. The bearing of Baker's Island Light from Titmanan light, should be W. S. W. instead of E. S. E.; and the bearing of Baker's Island Light from Moose Peckhead Light, should be W. S. W. westerly.
- Page 202. Note §. New London Light is represented as bearing E. N. E. from Little Gull Light, it should be N. by E.
