SCHOOL QUESTION

Keewatin Roman Catholics Petition for Separate Educational Institution.

OTTAWA, March 5 .- The Manitoba schools question is revived in a petition presented to the house today by Monsignor Charlebois, vicar apostolic of Keewatin, and 35 residents of the same locality, of which the headquarters is Le Pas.

It is cited that the Northwest Territories came into the confederation on an understanding that their civil and religious rights would be upheld. "Your petitioners pray," concludes

the petition, "that the Canadian Parliament by legislation, should settle the just grievances of which they complain, and in a way to ensure the peaceable enjoyment of the rights guaranteed by the treaty of 1870, by the legislation of 1875, and which conform to the first North m to the intent of the British North It is not presumed that any action

on the strength of the petition will be

SCOTIA'S CARNIVOROUS SHEEP.

(By Special Correspondent.)

HALIFAX, N.S., March 5.—Amongst the wild creatures that suffered most from the recent cold weather were the carnivorous sheep that swarm on the

eastern coast of Nova Scotia, on the archipelago upon which these inhabitants of the sea coast live. Scores of the wild sheep were found upon the ed7 shores of the rocky and wooded coasts where they had perished in their attempts to obtain their daily food of seaweed, dulce, eel grass and kelp, their shaggy coats a mass of solid ice from the spray that had washed over

A large number of the sheep are found in the County of Guysboro that LONDON, March 5.—The home rule for Ireland bill was introduced again into the house of commons today by Augustine Birrell, chief secretary for Ireland, and was read a first time amid prolonged ministerial and Nationalist save their bones in case of a fall.

Existing where cattle and horses to the control of the control Existing where cattle and horses cannot live, and swimming from island

brought to the region by hardy French pilgrims, and since that time their wild descendants have grown and multiplied, and are only kept from greater increase by the severe winter season. So quick and alert are they to danger that they seldom fall victims to the casual hunters, and at the first sense of danger they plunge into the waves and swim to safety.
