# London Tests of Disinfectants.

Gondon Globe)

Some experiments on disinfectants which have been carried out by Drs. Richi. Houston and Gordon for the bandon county council, have resulted to the great state of the great public. From a copy of the somewhat chansitive report, which we have received, one point is made abundantily dear that what is known as Condy's char, that what is known as Condy' huid, and also bleaching powder, wer in most cases useless as destroyers of the microbes selected. Of fluid disin fectants, carbolic acid (1 in 5), per manganate of soda bleaching powder are tested, while of gaseous disintested, while of gaseous dish-ents, formalin and sulphurous gas were made the subject of ex-

all gas were made the subject of ex-ments.

In the beaumary present-be br. Shirley Murphy, the medleal be br. Shirley Murphy, the medleal law was killed by all the distincet-tes except the two already named, at of diphtheria was destroyed by the beautiful the subject of the con-traction of the control of the con-trol of the control of the con-laining powder. The bacillus pyo-aneus was similarly acted upon, al-sophic control of the con-trol of the control of the con-trol of the control of the con-trol my by perchicalde of mercury, ob. together with carbolic acid, alone efficacious in respect to rerice bacilli. It is worthy of note meither formalin nor sulphur dibegave satisfactory results with wood and cloth infected with this

inal purposes is considerably less than the average. This, as has been stat-ed heretofore, is due to the fact that the fish livers this year are extremely lean, and the number of livers requirlean, and the number of livers req ed to produce a single hectoliter of oils a coordingly greater. To this fact may also be ascribed the small amount of livers remaining for the manufacture of oil other than medic-

ma unfacture of oil other than meliciture correspondent states that the amount of cod liver oil produced from lish taken this season in the districts outside of Lofoten is also very smail. The cause stated above applies equally the control of the

#### Canadian Northern Plans

Wm Mackensie head of firm of Mackenzie & Mann arrived in the city on Saturday last in his private car Antikokan. Mr. Mackenzis was seen by a reporter in the office of D. B. Hanna, general superintendent of the C. N. R. He had no new announcements to make.

"I have only lately returned from England" he replied in answer to the reporter's queries, "and consequently

Mr. Mackenzie laugh Territories. have one main ed. "We have one ma our old main line it have alway, had, why sl change it? What good doe us or what good does it do that why should we good does that do that do through which we run So long do run through the country difference does it make whether it called the main line or by anoth

called the main line to by mane?"

"Gives a better service probably," suggested the reporter, "and makes a shorter route."

"Well, any way there is nothing to say in the matter," said Mr. Macken-

zie.

This closed the interview and Mr. This closed the interview and Mr. Mackenzie said he did not know how long he would be in town or where he would go from here, but did not think he would make a trip of inspection over the branches.

## Prison Binder Twine.

The subject of prison binder twine and its manufacture was up for dis-cussion in the Dominion house a few days ago and the following debate en-

sued:
Upon the item for penitentiaries,
Hon. Charles Fitzpatrick stated that
it would be impossible to continue the
business of manufacturing binder
twine at Kingston profitably, under twine at Kingston profitably, under the terms of the resolution passed by the house last session. In accordance with that resolution the twine was kept on hand for sale to the farmers up till July let Applications from Sill farmers were received for a total of 45 tons, leaving a balance of something over 300 tons on hand at the date

Manitoba Farm Improvements-Farm Elevator and Granary of W. A. Card, Glenbord

have not had time to discuss at any length new projects. We are going ahead with the various connection works now started. The line to Lake Manitoba and St. Laurent will be oushed; work is being pushed on the pushed; work is being pushed on the Prince Albert-Edmonton line; the Carman line extension and the Beaver extension are being gone on with as rapidly as possible. Much depends on the liabor market, the amount of ma-terial available and other natural causes."

named, which was sold by public ten-der to Henderson Black, St. Johns, Que, There was a loss of \$10,000 on the year's output. Mr. Fitzpatrick dethe year's output. Mr. Fitzpatrick de-clined to take the responsibility for continuing the manufacture of binder twine under these circumstances and conditions, pointing out that when tenders were called for it was too late

in the season.

Mr. Richard Blain stated that the government had not been manufacturing the kind of twine which the farmwanted, and read a letter from the ers wanted, and read a letter from the warden of the penitentiary, stating that on the 17th of June they were out of pure manila and standard, which were the two brands used in Ontario. If these kinds were manufactured the ernment could sell every pound of

the Flightick replied that no difficulty had been experienced up to last year in selling it, and the elder the advice of the experies employed to supervise the work, who were appointed by the previous government. He asked Mr. Blain to state the proper quality of twine to manufacture, or justify of wine to manufacture of justice to sell out the plant for old iron if he could not get rid of it any other way and stop the loss. He had never approved the government's undertaking to manufactures of the All the various features of the All the various features of the were discussed by Mr. Robert Holmes, Hon. Wm. Ross, Mr. Geo. Taylor, Mr. T. O. Davis, Mr. E. Cochrane and Mr. Lennox. Mr. Fitzpatrick replied that no diff

Lennox.

Hon. Mr. Fitzpatrick, commenting upon the remarks and suggestions that

had been offered, said it appeared that the officials in charge of the binder twine factory had not kept up to date, and intimated that while he would stand by competent officials, he could not retain men in positions which they not retain men in positions which they could not fin satisfactorily. It might be that Mr. Taylor's suggestion, that an agent be sent out on the road to sell the twine, would be the i-st way of disposing of the twine. Mr. Stewart, in a brief speech, op-

Mr. Stewart, in a brief speech, op-posed the abandonment of the manu-facture of binder twine at the peni-tentiary, as its introduction had re-duced prices by two cents per pound if the manufacture was not to be con-If the manufacture was not to be con-tinued at Kingston he suggested the plant might be moved to the Manitoba penitentiary, where it would be in the heart of the wheat fields.

Mr. Fitzpatrick said he was perfect-

ly willing to consider the proposition that binder twine be manufacture Stony Mountainpenitentiary. He walso be happy to have binder to officials at Kingston appear before agricultural committee of the h agricultural committee of the house for examinary. The latter suggestion for examinary. The latter suggestion was accepted by the opposition and the industry. The latter suggestion was accepted by the opposition and the item carried, with the understand-ing that the debate should be resumed when the supplementary estimates were under consideration.
