C. P. R.'s New Line in the West. traffic in Western Canada by the Canadian Pacific Railway yesterday. The new line runs from Irricana to Standard and travels eastward from the Langdon-Acme branch thru the rich irrigation belt. It is 37 miles in length and will be of great service to the farmers in its district, in getting their produce into Calgary and other neighboring cities without delay.

This will be the biggest advantage offered by the new service, as it taps a very productive country, which has been developed by the C. P. R.'s irrigation system. The service which was inaugurated yesterday is a semi-week-ly one, operating on Tuesdays and Fridays. The stations of this branch are Chalghdu, Swastika, Nightingale, Tu-

Crop Conditions Cause More Alarm

News From the Western Wheat Belt Dominates Chicago Market-Brokers' Comment.

J. P. Bickell & Co. from Logan J. P. Bickell & Co. from Logan & Bryan:
Wheat—Market developed decidedly strong undertone after a considerable weakness early, the continued bad advices from the northwest, backed up with buying orders, being the chief influence. A large harvesting concern estimated the North Dakota crop at 50,00,000 bushels, and this had a bullish effect also, together with reports of black rust spreading. Rains in Dakotas were ovenooked or ignored, while the unseasonably cold weather in Canada gave rise to apprehension that the crop may be damaged. Weak features in the situation centre around Chicago, while elsewhere conditions appear more bullish.

Finley Barrell wires:

Wheat—Reduced estimates of spring wheat and report of black rust crossing the border, to-day turned a weak market into a strong one, and the close was firm at an advance of 1%c from the low point of the day. While no damage has been reported to the spring wheat crop as yet, the fact that rust is said to be in evidence in some sections was sufficient to disturb shorts, who covered freely on the advance. Northwest, especially Canadian, news will prove the dominating influence. But, as we believe there is more room for deterioration than improvement in the Canadian crop, to say nothing of other possibilities which are in favor of holders, we naturally feel more confident than ever that purchases, especially on depressions, will prove profitable.

Erickson Perkins & Co. had the follow-

Erickson Perkins & Co. had the follow

opinion that much higher prices will prevail later on.

Oats—Were easy during the early part of the session, but railied with the other grains. Shipping demand continues light, but cash prices were practically unchanged from those of yesterday. We look for a marked lowering of the crop figures in the next government report, and, while prices may be temporarily depressed by the movement of new oats, we have every confidence in ultimately higher values.

Veal Calves.

Erickson Perkins & Co. had the following:

Wheat—The market opened easier, with a continued bearish feeling on the part of local traders and selling by that element. The northwestern news, however, was so absolutely confirmatory of fust damage that their markets took the lead and advanced very rapidly over two cents per bushel from the low point, ours finally following. We continue to advocate the long side of the market on all setbacks, feeling that enough evidence is now at hand to warrant the belief that spring wheat crop prospects have been very materially reduced.

Corn—The market opened easter on general rains thruout the belt. Selling pressure, however, was not particularly pronounced, and predictions for a marked shortage in the yield of that state were current. We are still of the opinion that much higher prices will prevail lathr on.

Oats—Were easy during the early part of the session, but railied with the other grains.
