THE NIPISSING OF THE NORTH! **MOOSE HORN MINES** (MONTREAL RIVER)

from Elk City, with assays from six distinct veins, running from 250 to 13,-000 ounces of silver to the ton, with transportation assured during the winter by the Government Winter Road from Charlton, which crosses the prop-erty, WITH THE T. & N. O. RAILWAY SURVEYED TO RUN WITHIN 100 FEET OF THE MAIN SHAFT, which is down 72 feet, with fine ore from .60 feet, the Moose Horn Mine compares favorably with any mine on the Montreal River, and goes far to prove our assertion that in the Montreal River Section Cobalt has no mean rival.

Enough stock has been underwritten to provide ample working capital for one year. The present offering is made to put in a complete plant, including six-drill compressor, etc. This stock is going fast, both here and in New York, where it is listed on the curb.

Capt. John Harris says, in his report on the Moose Horn: "At about twenty-five (25) feet down the shaft, the vein widens to one inch of Calcite, in some places SHOWING ALMOST SOLID SILVER. The vein holds good to the bottom of the shaft and the full length of the drift.

"I have been in the Cobalt Camp almost from its beginning, and would say that there are as good showings of silver on the Moose Horn property as in any of the Cobalt Mines at their commencement, and for the same amount of work having been done.

"I BELIEVE THE MOOSE HORN MINE CAN BE MADE A PAY-ING PROPERTY FROM THE START."

Send your orders to the regular brokers, who are advertising the stock, or to the undersigned. Full information will be given at ROOM K (ON THE OFFICE FLOOR), KING EDWARD HOTEL, WHERE SAMPLES OF THE VERY RICH ORE MAY BE SEEN.

COME AND SEE THEM AND BE CONVINCED BY THE EVIDENCE OF YOUR OWN EYES. PRICE 50c PER SHARE.
