Narrow Champion Cross-Cut Saws

Feet 4½ 5 5½ 6

Toledo or Lance Cross-Cut Saws

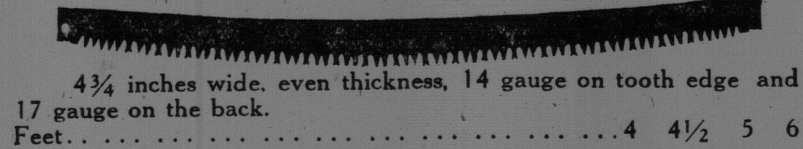

Feet 4½ 5 5½ 6

These Saws are ground two gauges thinner on back than on tooth end.

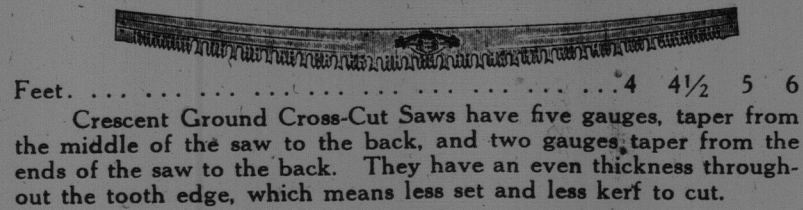

Beaver Cross-Cut Saws

For Felling and Buck Sawing, Fully Warranted

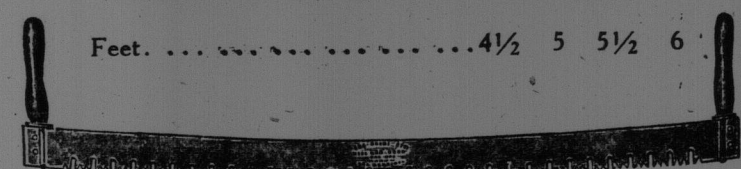

4¾ inches wide, even thickness, 14 gauge on tooth edge and 17 gauge on the back.
Feet 4 4½ 5 6

Simonds Crescent Ground Lance Tooth Cross-Cut Saws

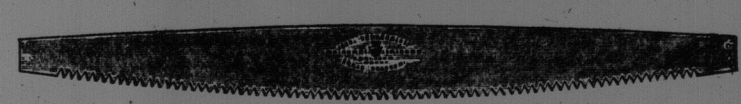

Feet 4 4½ 5 6
Crescent Ground Cross-Cut Saws have five gauges, taper from the middle of the saw to the back, and two gauges, taper from the ends of the saw to the back. They have an even thickness throughout the tooth edge, which means less set and less kerf to cut.

Great American Cross-Cut Saws

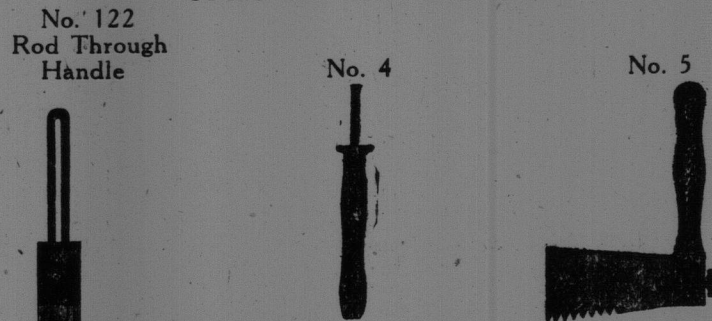

Feet 4½ 5 5½ 6

Tenon Tooth Cross-Cut Saws

Feet 4 4½ 5 5½ 6
These Tenon Tooth Saws are ground two gauges thinner on back than on tooth.

Cross-Cut Saw Handles

No. 122 Rod Through Handle

No. 4

No. 5

No. 5, Reversible Handles, light.
No. 9, Reversible Handles, heavy.
No. 122 Loop Handles.

The No. 122 Handle, when on saw, exerts a pressure from top of handle to bottom edge of blade, thus insuring a strong, firm grip on saw, without possibility of lost motion or wobbling.

Files

Mill Saw File

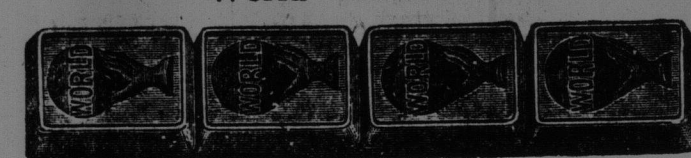

Taper Saw File

Inches 6 7 8 9 10

Red Diamond Emery Wheels

Especially suitable for saw grinding. Ask for price list.

"World" Babbitt Metal

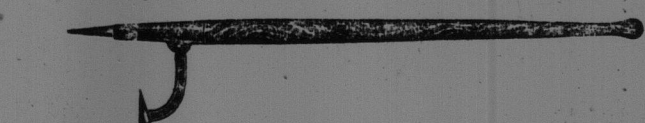

There are many anti-friction metals on the market, sold under various names, but still there is a demand for a good honest babbitt sold at a medium price.

We have studied the whole field carefully and selected a metal which we know to be good, and one which has been thoroughly proved.

We especially solicit a trial of the "world" babbitt, but know before hand you will be pleased with it. Ask for prices.

Drive Cant Dogs

Round Bill Hook. Solid Steel Sockets.

2¼ and 2½ inch Cant Dogs complete with 4, 4½, 5 or 5½ feet handles.
Sockets only, 2¼ and 2½ inch.
Pikes, Hooks, Bolts, only.
Handles only, 4, 4½, 5 and 5½ feet long.

PYRO ROOFING

Unaffected By Heat, Cold, Sun, or Rain

PYRO is a first class roofing in every respect and its advantages over other prepared or "Ready" Roofings is due to the fact that there is no coal-tar used in PYRO. This means that it does not dry up and become brittle under exposure to the heat of the sun. For this reason it retains its strength and pliability almost indefinitely, instead of becoming hard and cracking, as do roofings made of substitutes for natural asphalt.

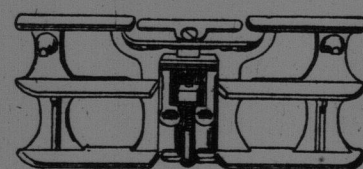

Put up in rolls containing 108 square feet, with cement and tacks—all ready to put on the roof.

On quantities we will quote you a special price, delivered to your nearest Railway Station or Steamboat Landing.

Cut Lacings

Made from best selected sides only.
Size, 1-4, 5-16, 3-8, 1-2, 5-8 and 3-4 inch.

McAvity Lumber Drivers' Boot Calks—Beaded

These Calks are made from the best Refined Tool Steel and Forged. The method of tempering leaves every one of the same temper, rendering them more stronger and durable than other Calks.

If McAvity Calks cannot be procured in your vicinity send direct to us.

Diamond Red Sheet Packing

For High Pressures
It packs any kind of Steam, Air or Hot Water Joint; it is a non-conductor, and lasts longer than any other packing in use. Joints should be faced with Plumbago, Lampblack or Chalk.

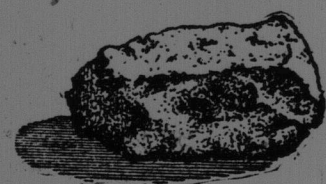

This packing can be taken out and repeatedly replaced.

Sizes in stock:—1-32, 1-16 and 1-8.
Packings of All Kinds Carried in Stock

"Bangor"

Selected Red Chalk

For marking lumber. The marking is always distinct, even on wet lumber, and will give better satisfaction than lumber leads. Put up in 50 lb. boxes, also sold in smaller quantities.

Genuine Balata Belting

The Best Balata Belt Made
Price List on Request
Also on

Oak Tanned Leather Belting, Red Stitched Cotton Duck Belting and Rubber Belting.

Hand

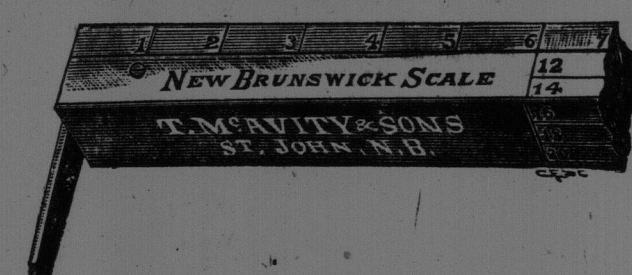

Tally

Registers

Furnished with 3 figures, as in cut, also with 4 figures. These little registers are used by lumbermen, loggers, timber estimators, etc. for checking or tallying; in fact, they can be used for any purpose where a correct count is desired to be kept. The count is recorded by the pressure of the thumb on the lever protruding beyond the case. In tallying, the register is held in the position as shown in the cut, and when not in use it may be suspended by a cord around the neck or carried in the pocket like an ordinary watch.
