### Filling the Gaps in Your Office Force

A GREAT many firms tell us that not only is it next to impossible to get clerical help, but many of those they do get are untrained and therefore inaccurate in their work. Fortunately this situation can be greatly relieved by the use of the Munroe Calculating Machine.

One girl and a Monroe can do the work formerly requiring two or three men. She doesn't need to be an expert. With a few minutes' instruction and practice, she can place your figure load on the

and you can be assured the work is absolutely accurate because the MONROE Mechanical Check puts a ban on operating mistakes. No rechecking is required. Look at any one of the problems listed at the left and compare the time required by the Monroe to solve it with the old pencil-and-paper method. The Monroe has a range of utility that embraces any figure problem in any business.

any business.

Mr. Manager, it is a difficult matter for you to determine the efficiency of the Monroe Machine by our telling you about it. Let us send a representative to demonstrate what it will actually accomplish in your own office.

You can then make your own tests and compare it with any other machine you may have in service. All of which means we have perfect confidence in the ability of the Monroe Machine to "make good." To bring the matter to a head simply mail the attached soupon. No obligation involved.

vast riches were at the start speculative. This is speculative. If this were not speculative—if oil were actually pouting from wells on this property today-you wouldn't have this opportunity-your money wouldn't be needed

Folks of very limited means—often very poor people with only a record for honesty—and many capitalists HAVE BEEN REAPING A FINANCIAL HARVEST through Texas oil resources.

It is reasonable to expect that what has happened elsewhere—in other Texas oil territories—must happen here. Those who bought ahead of the drill in other sections are rolling in wealth today. Take the famous Burkburnett and Ranger districts here at one time—not many months ago-leases could be easily bought around \$10.00 an acre. Deals have been reported recently as high as \$195,000 an acre. Frequent deals in that field are around \$25,000 an acre. An oil strike did the work.

### The Men Behind This Company

You are invited to "look up" this Company through any channel you may choose. The officers and directors whose names follow, are all men of integrity and reliability. They are putting their own money, their time and faith in this enterprise, with a determination to make it a big success.

M. B. SHEPARD, Secretary and Treasurer Manufacturer.

All the oil enterprises that are today pouring forth such Our Holdings in This Rich Field Offer Choice Locations for Many Wells

We own leases aggregating 292 acres situated Northeast of Roby, Fisher County, Texas, a short distance west of the Ranger field, where many gushers of from 1,000 to 12,000 barrels of oil per day have been brought in. Our leases offer choice locations for upwards of 60 wells. There are four oil sands in this section, and our chances of striking a gusher are equal to any and better than most

on the north and east we have Burkbernett Iowa Park, Electra, and Henrietta fields, and on a direct line, a short distance east the famous Ranger oil fields all big producers. The Company's land shows all the surface indications of oil that these other fields ever had. Producing wells are being brought in nearer every day—wells are now drilling to the north, east and south.

Many new locations are being made in this secton—drilling rigs are being repidly moved in and instructed to begin operations at once. The activity in this section is increasing daily and development is being rushed on a large scale. Any day word may reach us of the bringing of these wells—a gusher—would mean thousands or perhaps miflons of dollars in increased values of our leases and the stock of this Company.

These are some of the reasons—without going into geological or technical details—why the officers and directors of the Company have such faith in this property.

10 Cents a Share Now and Money Back in 10 Days if You Want it

To enable the Company to start drilling as soon as possible and to pay necessary overhead costs this popular subscription plan has been adopted, and this most unusual offer is made to those who will act at once. If you will remit promptly you will pay but ten cents per share or \$10 per unit of 100 shares. or \$10 per unit of 100 shares.

Send your money any convenient way—money order, check, bank draft or currency by registered letter—then look up the Company or directors or property, and if not perfectly satisfied, ask return of your money within 10 days, and it will be forwarded to you at once.

Facts concerning this proposition have been told you in brief without elaboration. What do you think about the prospects of making your \$10 in the venture grow many fold? As good as it looks, you have not been told anywhere near all the favorable things about this immease project.
