CLOSING EXERCISES AT SCHOOL FOR THE DEAF

Thirty-Eight Pupils in Attendance—Today's Programme an Exhibition of the Work Being Done

Closing a most successful year's work, the final exercises of the School for the Deaf, 204 Prince street, West End, were held this afternoon. There was a careful examination of the pupils in the various subjects listed in the curriculum of the school—history, geography, arithmetic, and especially language received attention and the methods of teaching were exhibited. As the lack of the deaf in language this branch receives the most consideration.

The examination was directed by the principal, Joseph Keating, who wished to make the final day of the year a work a practical exhibition of the ordinary procedure of the school. The methods of teaching under difficulties cannot be appreciated without actually witnessing the work in operation, and it was hoped that a large number interested would avail themselves of this opportunity of learning of the work at first hand.

The school has spent a most successful year. Thirty-eight scholars have been in attendance, but as none were taking the closing year's work, there are no graduates. In the examinations held in May an average of ninety-two per cent obtained by the school indicates the degree of perfection in scholarship.

OCEAN LIMITED

ALL YEAR ROUND IS A POSSIBILITY

Montreal, June 27—(Canadian Press)—H. A. Price, assistant general passenger agent of the Intercolonial Railway, declares that travel is much heavier than in previous years, and despite the increased number of trains, the accommodation is taxed.

That the plan of the commissioners was to put on the Ocean Limited a little earlier every year, and take it off later, so that in time the two trains would be run all the year round, was the opinion of Mr. Price.

A Lease Matter With Which Board of Works Has to Deal—More Telephone Poles To Go Up

Several matters of public interest are to be dealt with this afternoon at the meeting of the board of public works. The item calling for the largest expenditure is a recommendation for the replanking of Rodney wharf at a cost estimated at \$8,000. The remainder of the business has to do with the renewing of retaining walls, planting of electric signs, calling for tenders for the disposal of the garbage and waste of the city, and general repair work.

The city engineer, Mr. Murdoch, has recommended in his report that the N. B. Telephone Co., be permitted to place poles as follows: Nine in Becland Road, four in Kitchener street, three in Barker street, four in Somerset, and six in Cranston Avenue. He has also recommended that repairs be made to Newman brook bridge at an estimated cost of \$200, and that asphalt be laid in Marsh, Spruce, Autumn, and Gooderich streets, at an approximate cost of \$400.

An interesting question is to be considered in the matter of the encroachment by the city on the property at the southern end of Charlotte street extension held under lease by Messrs. Gregory. They offer to give the city a release in consideration of the city's conveying to H. C. Gregory that portion of Canterbury street between St. James and British streets.
