Washington Rumor Says Opinion Divided as to What Should Be Next Step But Recall of Ambassador is Expected Soon

(Canadian Press)

Mexico City, Nov. 17.—General Huerta... his part in the recent exchange of communications with the United States as finished. He expects to find difficulty in consummating his plan to send his new congress to full organization tomorrow, and he continues planning his military campaigns and carrying out his policies of pacification.

Washington. A further move may be taken at Washington is a question which neither Mexicans nor the foreigners find an easy one to answer, but there was no doubt today an increasing expression of opinion that the United States would continue her hands off Huerta. This was a predominant belief, but those who expressed it said that there was in Washington an element which would be inclined to see the Federal representatives play their own game to finish, the taking of Huerta by the arms, being cited as perhaps an encouragement of such a disposition at Washington.

It was reported unofficially today that Huerta had been captured. The report was, however, with little information regarding the military operations, especially in the north, in which Huerta is said to be victorious. The situation about Tuxtepec, the centre of oil industry, is described as acute. It is urged that the foreigner in their will and to leave them, as they do not propose to leave an unsecured supply of fuel oil, and the rate is not to enable the government to live revenue from that source.

(Special to Times)

London, Nov. 17.—Returning in advance of the empire parliamentary party, Hamar Greenwood, M. P. for Sutherland, related some interesting experiences of the first organized party tour of the empire.

As representing both houses of parliament and the various parties in the House of Commons, this was decided on as one of the methods of extracting the highest value from the tour. It is a very important opportunity for acquiring intimate knowledge of conditions in the various parts of the empire and imperial policies in general. It seemed almost grotesque said Mr. Greenwood, that not until 1913 had any organized representation of the imperial parliament undertaken a survey of the empire. The first organized party tour of the empire was decided on as one of the methods of extracting the highest value from the tour.

The potato crop is considerably below the average being about a ninety per cent. crop all round. The damage has been very great. There was considerable loss from frost in September, with the result that the tubers are small in some sections of the country, especially in the King's county. In some sections they are rotting badly.

The apple crop is in general light and not of good quality. The early apples were about a 75 per cent. crop, fall apples about 65 per cent. and winter apples about 60 per cent. on the whole, were an average crop.

The poultry industry is making great advances. There were so many eggs offered this time of the year, and the prices have never been higher. The high prices have caused a considerable increase in the number of birds raised, and there is a considerable surplus of birds at present.

Boston, Nov. 17.—Turkey at fifteen cents a pound is possible if the right methods of raising are used, said Dr. Charles P. Higgins, pathologist for the Dominion of Canada, in a lecture at the Harvard Medical school.

The disease of blackhead has been the cause more than anything else, of the scarcity of turkeys, he said. They can be raised at a small cost and marketed profitably at fifteen cents a pound. To raise turkeys successfully they should be hatched by artificial means, and should be kept away from ordinary fowl.

B., Nov. 17.—Judge Wilson this morning gave judgment in the application for a writ of habeas corpus in the case of Eva Smith, a thirteen-year-old girl wanted by Halifax authorities, granting the order and sending the girl's discharge from custody. He took ground that the arrest was illegal, but held that this could not be a case for the Halifax authorities are anxious to get possession of the girl as is shown by the fact that W. J. O'Heara, K. C., a noted criminal lawyer, has been sent here to consult with A. R. Slipp, K. C., who has been handling the case of the attorney-general of Nova Scotia. It seems certain that another move will be made but it is not known as yet what form it will take.

The Busy Bee

Advertising is the bee that puts the "buzz" in business. Newspaper advertising is the best and most productive form of advertising—because it reaches the people at the time they are ready to act on the impulse.

A newspaper advertisement suggests something near at hand—not far away. It carries with it an unwritten "Do It Now" message. And the advertisement that brings the "I WILL" into the mind of the advertiser—the advertisement that pays. Local merchants have long counted the newspapers as their best help to success and manufacturers are now seeing the light as never before.
