## TIME PROCLAMATION

### Reasons for Proposed Changing The Change to 60th Meridian Cffi of Steamer to St. John-Halifax

The reasons for the proposed diversion of the steamer Harlaw to the St. John-Halifax route are thus given in the St. John's (Nfld.) Telegram:-

It must not be inferred from the refer-

and that, under the government's contract with the Reid-Newfoundland Company, this is to be a permanent service, it will be quite possible to do without the Harlaw. We hope the people will fully realize this fact and readily take advantage of the Reid-Newfoundland Company's fa-

Then, again, it is very desirable that the trade of the West Coast should come here to St. John's instead of going out of the country. Business men at Bonne Bay and other places, we are confident, could do just as well with our merchants here as they are now doing with those of the neighboring provinces, and, in some lines of goods, perhaps, a little better. The only drawback would be the difficulty in getting a ready and profitable market for all kinds of West Coast produce.

A THE THE PERSON OF A PARTY OF A

cially Announced.

The Royal Gazette this week has the following proclamation establishing 60th meridian time within the province of New By His Honor The Honorable Jabez Bunt-ing Snowball, Lieutenant-Governor of the Province of New Brunswick. J. B. Snowball.

It must not be inferred from the reference to the Harlaw elsewhere in today's Telegram that this steamer has already been taken off the West Coast route, nor is it certain that she will be, this season at any rate. Her owners are disappointed in not receiving a subsidy from the Newfoundland government, and hence, perhaps, their threat to put her on another we need hardly say that her regular summer trips along the coast during the past few years have given a strong stimulus to trade, particularly from Bonne Bay to Bay of Islands, and her withdrawal from that route would be a great inconvenience to the people, if no other means of communication were substituted.

Now, however, that a first-class boat has been put on between Bay of Islands and Flowers Cove, for the summer months, and that, under the government's contract of the paid-Newfoundland Company,

Whitman Brewer, of St. Mary's, contractor and builder, who repaired the bridge last fall, told of the repairs made at that time. The rots he saw in the bridge were the effects of the weather. He was satisfied when the bridge was finished that it was perfectly safe. Never knew of hard pine giving out in 12 years. He had never heard train employers say portions of the bridge were rotten. He had about 25 years experience in bridge building and the span would compare favorably with other spans he had built. He could not arrive at any conclusion as to why the bridge went down. It was not, in his opinion, due to
