

nearly every afternoon is one of the most beautiful of parks - doing nothing but drinking in fresh air and sunshine - and I am satisfied this investment of time is bringing big returns in good health. The mornings have been given over mostly to treatments of one kind and another and the rest which should follow them. Altogether I have become so thoroughly lazy that I fear for myself when the time comes to take up regular duties again.

My doctor here thinks that by the use of the mouth I should be able to take up work in some such measure as you have suggested. I mention I could have no better preparation than the life here.

by a soft rubber substance known as rubber dam. A few days later some gauze was substituted, and at the last dressing nothing was left in and the wound is being allowed to heal over. At the same time temperature has kept down - at least for the last three days it has been normal. Nothing could be more promising, and I have been very happy in the assurance of an early return to usual strength.

The pneumonia germs still show themselves in the sputum tests, but with the steady strengthening of the system they are sure to be dislodged.

I have spent most of
