QUESTIONS AND ANSWERS.

Miscellaneous.

COMFORT FOR HIRED MAN—BARN PAINT.

1. We intend building a horse barn this summer, and when through, intend giving it one or two coats of paint, and would like to know what would be the cheapest and best sorts to use to get a good job. Would it be best to buy the material and mix it myself, or would it be better to buy the ready-mixed, put up in cans?

2. We also intend having a room in basement where the hired man can rest during stormy weather, and would like to know if there is any way of heating it without danger of firing the buildings.

SUBSCRIBER.

Ans.—1. Venetian red, lead and oil is the mixture commonly used, with a white paint made of lead and oil for window casings and other trimming. Hardware dealers tell us a good ready-made barn paint can be obtained equally good, if not better and cheaper. A card, addressed to A. Ramsay & Son Co., paint-makers, Montreal, mentioning "The Farmer's Advocate," would bring you information on the subject.

2. Hot-water systems are regarded as most up-to-date, but whether one could be utilized at reasonable cost for heating the quarters where the hired man is to take the rest cure, we could not undertake to say. It would probably be safer and more economical to rest in the house, if there is no inside barn work to be done while the storm is on.

MILLETS.

1. What time of the year should millet be sown?

2. How much should be sown per acre?

3. Which is the best for horses and cattle, millet or Hungarian?

4. What kind of soil would be best suited for these grasses?

A FARMER.

Ans.—1. Millet is a hot-weather crop, and should not be sown till the ground is mellow and warm, say the last of May, or along in June. It is often grown as a catch crop, and if the seed-bed is properly prepared, it may be sown with success as late as July.

2. Of the ordinary varieties of millet grown for hay or soiling, two or three pecks of seed per acre is an ample allowance; when grown for pasture, three or four pecks should be used.

3. Hungarian grass is one of the many varieties of millet. The Department of Astrology, at Washington, D. C., classifies millets into four groups, viz., the Foxtail, the Barnyard, the Broomcorn and the Pearl millets. The Foxtail group includes the common millet, the German, the Hungarian and the Golden Wonder. The Barnyard group includes the Japanese varieties, which are of much larger and coarser growth than the Foxtail millets. The Pearl millets are also very large and rank-growing—something like corn or sorghum. On rich soil, these will grow to a height of eight or ten feet. At the Ontario Agricultural College, the following average yields have been obtained in a series of eleven years' testing several varieties:

	Tons green fodder (11 yrs.).	Tons hay (10 yrs.).
Holy Terror	Gold Mine.10.98	4.72
Japanese Panicle	10.62	4.67
Golden Wonder	11.38	4.54
Magic	10.20	4.19
Japanese Barnyard	10.11	4.01
German or Golden	9.57	3.75
Hungarian Grass	8.87	3.59
Common	8.60	3.54
California	7.81	3.16
White French	6.16	2.49
Red French	4.98	2.10

Although some of the other varieties outyield the Hungarian, one can make no great mistake in using it for hay or green feed.

4. Millet does best on soils rich in humus, such as drained swamps and slough lands and muck soils not too wet or too dry. It will, however, do fairly well on almost any kind of soil, if sown on a good, well-prepared seed-bed.

CURE ALL KIDNEY TROUBLES.

Mrs. Hiram Revoy, Marmora, Ont., writes: "I was troubled for five years with my back. I tried a great many remedies, but all failed until I was advised by a friend to use DOAN'S KIDNEY PILLS. I did so, and two boxes made a complete cure. I can heartily recommend them to all troubled with their back. You may publish this if you wish."

Price 50 cents per box or 3 for \$1.25, at all dealers, or mailed direct on receipt of price by The Doan Kidney Pill Co., Toronto, Ont.

Maple Lodge Stock Farm 1854—1907.

Am now offering a grand lot of young **Shorthorn Bulls**, several from choice milking strains. Also a few extra good heifers.
