MOTT'S BROMA.

TITLE following observations having reference I to the preparation of BEOMA, appeared in a late number of ile Boston Medical Journal ---1 " A few years store a great manafacturer of Broma songet the opinions of many medical genthanen of dis incion, for the purpose of having an un bj cti nable food for mealide, and was assured that he had fully succeeded. Hospitals, infirmaries, and households generally, should always be provided with it. Whap grael, arrowroot, groats, barley, starch, rice, faring, and many other things ordinarily rescried to for patients are of no utility, the Broma is sometimes relished. It is believed that those who use it as a beverage will have manifest diatetic advantages over the consumers of ten and cuffre. We see it stated that during the last summer those individuals who were continually using Chocolate or Broms neither had attacks of cholers or dysenteric affictions, while others of the some families, taking their daily potations in ten, cotten, or simple co d water, were the sufferers, if any. We cannot wouch for the truth of this but it has recalled to mind the statement that the oil dealers in Lundon have been free from cholers or the choleroid symptoms. And it has been fur ther observed, that persons who were taking cod liver oil for chronic difficulties, during the prevalence of the late epidemic, were not affected by it Vegetable oil in the first instance, and animal oil in the last, taken internally, would appear, by these statements, to have secured those who took them from the shafts of the postulence. It is certainly a point well worth while to determine, who-

other infected oties." MOTT'S BROMA has now been before the public for a considerable period, and along with the commendations of the Medical Faculty of this and the neighbouring Provinces, it has received the approbation of all classes of consumers. - It is held to be an article of standard reputation, and the demand for it is constantly increasing
