1880. Harper's Young People ILLUSTRATED.

The evils of sensational literature for the young are well known, and the want of an antidote has long been felt. This is supplied with Harper's Young People, a beautifully illustrated weekly journal, which is equally devoid of the objectionable features of sensational juvenile literature and of that moralizing tone which repels the youthful reader.

The volumes of the Young People begin with the first Number, published in November of each year. When no time is mentioned, it will be understood that the subscriber wishes to commence with the Number next after the receipt of order.

1880. HARPER'S BAZAR. ILLUSTRATED.

This popular periodical is pre-eminently a journal for the household. Every Number furnishes the latest information in regard to fashions in dress and ornament; the newest and most approved patterns, with descriptive articles derived from authentic and original sources; while its Stories, Poems, and Essays on Social and Domestic Topics, give variety to its columns.

The volumes of the Bazar begin with the first Number for January of each year. When no time is mentioned, it will be understood that the subscriber wishes to commence with the Number next after the receipt of order.

J. W. ELLIOT'S Patent Saver HALL STOVE.

The advantages gained over all other stoves are it produces the greatest amount of heat from a given amount of fuel; this is accomplished by the fire pipe, which is bent down, around and underneath the base. Another object is to secure the greatest possible benefit of the fire which consists in placing around the body of the stove a series of internally projecting pockets over-lapping the fire pot, and so formed that the air of the room is admitted into the lower end of the pockets, and, after passing through them, re-enters the room, having become intensely heated through contact with the inner sides of the said pockets, which are immediately over the hottest part of the fire, thereby producing far greater results from a

GIVEN AMOUNT OF FUEL THAN ANY OTHER STOVE.

An Evaporator which is part of the Stove.

The cover is a water tank, and becomes an effective evaporator, which produces a greater or less amount of vapor in proportion to the intensity of heat.

There is a double heater, by means of which heat can be conveyed to an apartment above, and supplied with sufficient vapor from the tank. Also a combined hot air and steam bath is thereby produced if desired.

It is Simple and Easy to Control.

The base plate is of cast iron in the place of zinc or other perishable material and is raised sufficient for the cold air on the floor to pass up through its raised and hollow cone-shape to the stove, and the circulation produced thereby equalizes the temperature of the room.

There are two grates similar to the base of a circular basket. They can be rotated together or separately.

The fire can always be re-lighted without removing the coal. No screening or sieving, and no waste whatever.
