60 DAYS' FREE TRIAL

of a World-Famed Remedy

Use my Invention for 60 days. If then cured, pay me. If not, return it. I ask not a penny in advance or on deposit.

Health is happiness. It is the foundation-stone of the happy family. It is success in business; it is contentment and self satisfaction. You enter your home after your day's work, and even though tired, your buoyancy fills the house with joy and pleasure. Your friends seek you, and you are the center of all that is true wealth—perfect happiness, cheer and contentment. All the money in the world cannot give you these if you have lost your health. The debilitate bring only misery into a family: are often shunned by their friends, and are generally a failure in business or their vocation. Life is a burden to them. I think this state almost a crime when a reasonable opportunity is offered to overcome it. There is a way to overcome it. I have a cure for these unfortunate men and women, and since I found the remedy 40 years ago I have aided more than 100,000 to regain their health and strength.

My treatment for those who suffer from Rheumatism, Lumbago, Nervousness, Melancholia, Lame Back, Wrecked Stomach, Ataxia, Partial Paralysis, general ill health, etc., is the simplest and most natural ever offered. It is Electricity. Everybody to-day knows that a normal quantity of it in the human body means perfect health and strength. A deficiency means weakness and disease. I can give you back this natural electricity and make you as well and strong as ever you were. So confident am I of what I can do, that to anyone suffering as above, I will give my World-famed, Dr. Sanden Electric Herculex, completely arranged for men or women, upon absolute

TRIAL UNTIL FREE

NOT one penny do I ask you to pay in advance or on deposit. My low-power Herculex at \$5,00 is strong enough in many cases. If you wish to buy for cash, I give a very liberal discount. I cure people every day in this way.

As the originator and founder of the Electric Body-Battery system of treatment, my success is the envy of many, and my Herculex, of course, is imitated (what good thing is not'), but my great knowledge gained from forty years' experience is mine alone and cannot be imitated. I give advice free to my patients till the cure is complete. My Electric Herculex, guaranteed to give a current instantly felt, or I forfeit \$5,000, and to last for at least one year.

Call or send for my Herculex to-day, or if you want to look into the matter further, I have two of the best little books ever written on lectricity and its medical uses, which I'd like to send you. Sent free, sealed, upon request.

THE OLD RELIABLE BRANCHES

The Massey-Harris Company, Limited, have had in contemplation for some months past the erection of a Track Warehouse for storing and distributing their goods at Brandon, and we learn that last week the contract was let, and the work is now under The building will be 192 feet way. by 48 feet, but it may be found necessary to add to it in a short time It best is expected that the warehouse will be completed and ready for transshipping work within the next six weeks or two months.

Situated as it is, Brandon makes a splendid distributing point, and the Massey-Harris Co., Limited realizing this have established this warehouse for distributing their farm machinery along the Estevan, Arcola, Main, Pheasant Hills, Lenore and Brookdale

HORNED

J. H. Grisdale's experiments at the Central Experimental Farm show unquestionably in favor of feeding steers loose rather than tied, but the steers must not have horns. Cattle should be dehorned as yearlings or else as calves; for the latter the following method is

Clip the hair from the top of the horn when the calf is from 2 to 5 days old. slightly moisten the end of a stick of caustic potash with water, or moisten the top of the horn bud, and rub the tip of each horn firmly with the potash about a quarter of a minute, or until a slight impression has been made on the center of the horn. The horns should be treated in this way from two to four times at intervals of five minutes. If during the interval of five minuutes after one or more applications a little blood appears in the center of the horn, it will then only be necessary to give another very slight rubbing with the

The following directions should be resulty observed: The operation is Yorkshires and Shorthorns and should not be set ninth day. Caus tained from any white stick. When

be kept in a stope dry place, as it ren exposed to .ti.

LOOSE STEERS MUST BE DE- One man should hold the calf while an

Roll a piece of tinfoil or brown paper around the end of the stick of potash which is held by the fingers, so as not to injure the hand of the operator. Do not moisten the stick too much, or the caustic may spread to the skin around the horn and destroy the flesh. For the same reason keep the calf from getting wet for some days after the operation. Be careful to rub on the center of the horn, and not around the side of it. Caustic potash is poisonous and must therefore be kept in a safe place.

GOSSIP

Topman's Duke 5th has been sold by J. G. Barron, Carberry, to J. H. Hutchinson, Hayfield, Man.

We have through the courtesy of the secretary received a copy of Vol. 1 of the Percheron Register published at Columbus, Ohio, by the P. Registry Company of which Chas. C. Glenn is the Secretary. The volume contains the registration of 357 horses. The fees for registration \$5.00 for imported animals, \$3.00 for American bred, nonmembers pay 50 per cent extra; and 25 per cent extra is charged for those not registering animals within a year of importation or foaling. The hibernating animals of the prairie

country are the bear, the badger the porcupine, the raccoon, the skunk and the woodchuck. The bear is content to find for a winter home some hole in the side of a wooded bank where scrub conceals the entrance. The badger's burrow is on the prairie and the entrance is generally closed with snow caught by the winter berry bushes. Raccoons and porcupines are not common. Woodchucks are more numerous but are seldom seen as they keep mostly in the thick woods. The skunk is the most luxurious and not only prepares a warm bed at the bottom of his burrow but closes the entrance with a bunch of some material to exclude the cold.

—Hartney Star.

A novel offer is made by the Iowa Seed Company this year to the effect that anyone writing to them, mentioning this paper, will receive a sample package of seed of a new grass they are introducing. This grass is what is called Teneriffe Canary Grass and besides the seed which it produces for bird feed is highly recommended for fodder pur-It is said to be perfectly hardy in the Northwestern States. It some what resembles in appearance fodder corn, and grows from eighteen inches to four feet high, depending upon the nature of the soil

There is always much information to be gained from the literature annually put out by the seed companies, and we would advise our readers to write for the Spring Catalogue of the Iowa Seed Company, Des Moines, Ia.

A HEAVY CLYDESDALE COLT.

I notice in my last gossip that you make me to say, that my year old colt Western Pride weighs 1850 pounds. It is possible that my notes read that way, but if so I made a mistake. Kindly correct above in next issue; his weight at the time was 1350 bounds. ANDREW GRAHAM.

MOUNT BIRDS

was long kept a secret. We teach you by mail to correctly mount birds, animals, fishes,

birds, animals, fishes, heads, tan skins, etc., make fine rugs and collect insects. A deli htful, fascinating art, easily and quickly learned by men, women and boys. Sportsmen and Naturalists can save and turalists can save and turalists can save and turalists can save and turalists can save and turalists. Thousands of successful graduates.
