## Religion By Radio Is Churches' Plan

Vatican to Broadcast Pope's Voice, Setting Example For Other Denominations.

### MILLIONS TO BE REACHED

World-Wide Spiritual Regeneration Is Hoped For.

CHICAGO, Dec. 26.—To disseminate more widely the religious teachings of Christian churches, radio broadcasting is soon to be undertaken by many of the larger denominations, says an article in the forthcoming issue of Radio Digest.

The magazine sets out that active steps already have been taken by several Christian churches to utilize radio communication as a means of reaching millions of persons who might have no other contact with religion.

"The Vatican will in a few months adopt radio to spread the word of the Pope to millions over the world," the article asserts. "Due to efforts of a company headed by Guglielmo Marconi, radio inventor, a broadcasting station may soon be operated in the Vatican. By this means Rome will be enabled to transmit the voice of the Holy Father to almost every land."

Protestant Churches' Plans.  
"Of similar magnitude is the probable scheme of Protestant churches, particularly in the United States. In the last few years chiefs of Protestant denominations in this country have considered the practicality of radio as a means of spiritual regeneration."

"Independently of each other, their executives and prominent ministers have used radio for broadcasting sermons, Biblical lessons and appeals to the public audience. But not until the last few months have the national advantages of radio been deeply considered."

"The next quadrennial meeting of the Federal Council of Churches of Christ in America may include in its program plans for utilizing radio in a national scheme to bring the church to the people. The Methodist Episcopal Church, through its committee on conservation and advance, may soon consider the national application of broadcasting," says R. J. Wade of Chicago, one of the executive leaders.

Churches Likely Soon.  
Delegations from the Episcopal, Roman Catholic and Greek Orthodox Churches are likely to confer soon as to the practical use of radio to send spiritual and other messages to all religious denominations, in the opinion of the Rev. George Craig Stewart of Evanston, Ill., on his return from a conference which received from the League of Nations a proposal regarding the international conference.

Likewise, the article says, the Baptist and Lutheran denominations are considering utilization of radio communication in their work.

### German Heroes Joke at Pay

BERLIN, Dec. 27 (AP).—Holders of German medals of valor are entitled to draw 25 marks in legal money monthly from a grateful country's treasury. In pre-war days this was more than \$6. Today it is one forty-billionth part of a German pfennig. But some of the medal-wearers with a grim sense of humor still apply for the payment.

One hero remarked: "It takes some courage for officials to look into the face of a man who risked his life for his fatherland and pay him one forty-billionth of a penny for it."

### Where German Living Is Costly

MANNHEIM, Dec. 28 (AP).—According to figures compiled by the publication "Wirtschaft und Statistik" Mannheim and Aachen are now the most expensive German cities in which to live. Ludwigshafen, Worms and Karlsruhe stand in second place and Berlin, Bremen and Hamburg hold third rank.

### Queen Mary's Hope For Her Daughter

There is a story told about Queen Mary which, regarding the source from whence it comes may be accepted as authentic. On the evening of Coronation Day (1911) Princess Mary (now Viscountess Lascelles) was met on the stairway of Buckingham Palace by one of the gentlemen in attendance on His Majesty, who gently remarked: "Well, little lady, so it's all over."

The Princess went straight to her mother, told her what had passed, and protested:

"He ought not to speak to me like that. I am a Princess."

"Yes," said the Queen, "you are a Princess now. I hope by and by you may be a lady. You may go and tell so."

## Million Beds Needed In 1924 London Event

British Empire Exhibition Always Attracts Huge Crowds of Visitors

### EXPECT 25,000,000

Upwards of about twenty five million people will, it is estimated, visit the British Empire Exhibition at Wembley next year. Scores of thousands of "extra" visitors will be in London during the spring and summer because of the exhibition, and London is making so adequate arrangements to give them house room.

Careful calculation have been made regarding the number of visitors coming to London from the Dominions, and the estimated totals are:

Canada . . . . . 200,000

Australia . . . . . 60,000

South Africa . . . . . 40,000

New Zealand . . . . . 20,000

300,000 From U. S.

There will be in addition, 300,000 tourists from the United States, and a heavy invasion from the Continent. The provinces will pour countless thousands into the metropolis during the opening of the exhibition. The abnormal rush will be concentrated into the months from May to August. London will be crowded as never before. What will become of the visitors? Where will they go for bed and board?

The prospect is already making London hotel managers uneasy. A joint committee representing the hotel industry considered the whole position for a central and official accommodation bureau to the authorities of the exhibition, but the scheme was not approved.

## Man Who Made Positive Good Eggs In Denmark, Dies

COPENHAGEN, Dec. 9 (AP).—After several months' illness, the man who brought the Danish egg to the notice of the world, Frederik Moller, died recently. Moller started life as a school teacher, but in 1899 started a campaign for the improvement in quality and production of the Danish egg. He organized egg collecting stations or circles throughout the country introducing a simple control system whereby he was able to trace every egg back to the producer.

Every circle and producer had a number which was stamped on the egg, and if a customer complained that his egg was bad it could be returned to the suburban grocer, who in turn informed the Danish shipper. The producer was promptly fined for the first offence, and for the second offence was discharged from the magic circle of producers.

Moller's efforts to improve the quality and quantity of the Danish egg came in for a good deal of criticism and opposition, but he stuck to his task of organizing on co-operative lines, and his concern, the "Danish Egg Export" which had a turnover of 80,000 crowns in 1920, turned over 4,701,000 crowns in 1922.

**SAVES DOCTORS' BILLS**

**ECZEMA ENDED**  
Madame A. Lariviere of Fall River, Mass., suffered with eczema for three years, and had treatment from several doctors, all of whom gave up the case. "Finally," she says, "I went to a specialist, which cost me another \$20, but I was no better."  
"A friend advised me to try Zam-Buk, which I did, and for which I have ever since been thankful. I very soon felt some relief, and perseverance with Zam-Buk completely rid me of the disease."

**SEVERE CUT HEALED**  
Mr. C. Oakley of Saskatoon, who sustained a terrible cut on his leg, says: "Had I known of Zam-Buk when the accident occurred, I could have saved myself a \$40 doctor's bill! A doctor sewed up the cut and attended me for five weeks, but the wound did not heal, and he advised me to go into a hospital."  
"I objected, however, and used Zam-Buk instead, and in two weeks' time was back at work."

**SAVED OPERATION**  
"Father developed a painful sore on his face," writes Miss N. Lewis of Silver Lake, Oregon. "Numerous remedies and treatment from several doctors failed to heal it, and the doctor advised an operation. Someone advised him to first try Zam-Buk. A few applications brought relief, and continued use of Zam-Buk entirely healed the sore, saving father from an operation."  
Zam-Buk is best for eczema, ringworm, and rheum, boils, pimples, ulcers, abscesses, blood-poisoning, piles, cuts, bruises, burns and scalds. All doctors like it.

## The World's Press

### A Vacant Seat.

(Kansas City Star.)  
Germany wants membership in the League of Nations. Well, it can have the place that has been reserved for the United States so far as this country is concerned.

### An Anomalous Era.

(Boston Globe.)  
The curious historian, one hundred years hence, will probably be interested in our prohibition regime of today. He will possibly class it with those other anomalies of national affairs which make history so readable. Meantime, it looks as if Santa Clause would need a rowboat instead of a sleigh.

### Labor vs. Rest.

(Ottawa Daily Herald.)  
(Urging British Labor Party to reject all offers of coalition): Tories and Liberals are merely wings of one party. They pretend to fight each other. They are really in earnest, both of them, about fighting Labor. If anyone doubted this before, the present contest has proved beyond all cavil that it is the fundamental truth. Honest Tories and Liberals admit it themselves. As one of them said a few days ago: "In this election party labels don't count."

### The Lobster's Hire.

(Indianapolis News.)  
Big crowds at sport contests and large receipts have influenced some colleges in the wrong direction. They still would be serving principal purpose if they had competent facilities and no varsity teams. They hardly would be doing that if they had varsity teams but no classroom work. Putting the emphasis on athletics by the payment of salaries to coaches that are much larger than teachers' salaries is not a good sign.

### Norway Thinks Twice

(Baltimore Sun.)  
Norway's anticipated abandonment of prohibition is not to be taken as an indication that the whole nation is planning to become drunk. The evils of intemperance are understood, and although extreme prohibitionists of these parts may feel that the cause of righteousness is about to receive a mortal wound it is reasonable to suppose that those who are capable of looking facts in the face will take comfort from the knowledge that the corrupting influence of illegal liquor will no longer be felt as it has been under the prohibition regime.

### The Attack Is Launched

(London Morning Post.)  
The Conservatives must realize that they are now in a flight for the mere existence, not only of their party and of our native institutions, but the very lives of the decent people of this country, the working class as much as any other. We are sufficiently aware of the horrid plans of the Revolutionaries and the strength of their organization, to say that nothing can save this country unless our Conservatives throw all their energies into the struggle. And we feel certain that they will do this better as a free and independent party, than as the wing of an unprincipled Coalition.

### Stepping Short in Education.

(Springfield Republican.)  
America, in such matters, is rather too impatient, but when it has educated young people for a career it does not see them through. It plants the seed generously, but is careless about reaping the harvest. After such immense sums have been spent for education it would cost but a trifle more to aid some of the most promising and industrious workers to do something worth while. America ought to be getting its share of the Nobel prizes for literature as well as for science, and to be producing symphonies and operas as well as jazz and "song hits." Success in artistic creation cannot be guaranteed by the most lavish expenditure, but a very moderate sum judiciously used might go far to create the conditions necessary for success.

### BUCK UP!

Square your shoulders to the world! It's easy to give in—  
Lift your chin a little higher!  
You were made to win.  
Get your teeth, but smile, don't frown.  
We all must bear our bit,  
It's not the weight that bears us down,  
It's the way we carry it!

### YOU'VE GOT TO KEEP ON

One step won't take you very far.  
You've got to keep on walking;  
One word won't tell folks who you are,  
You've got to keep on talking;  
One inch won't make you very tall.  
You've got to keep on growing;  
One little ad won't do it all,  
You've got to keep them going.
