

Mr. Dowden Deals With Civic Improvements

Editor Evening Telegram:
Dear Sir,—I promised in my last letter to deal with water and sewerage and with your permission I will do so. The problem has been a difficult one. The Board is giving it constant consideration and I think every open-minded citizen will admit that much has been accomplished by the present council, fully justifying us in seeking reelection.

It may not be generally known, but it is a fact never the less that there are about eleven hundred houses in St. John's today without water and sewerage, and the saddest part of it is the majority are unsuitable for it. One of my keen points during the last four years has been to get as many houses as possible connected, and in that I was not alone for every member of the Board was as anxious as I.

A friend of mine remarked the other day "get clear of the Night Carts, and the city will be alright." In view of what I have just said about 1100 houses being unsuitable how can this be accomplished. My answer, Mr. Editor, is that it can only be done in time, the process must be slow. Not so long ago there were two dozen of these night carts, while at the present there are only six. The late Commission did much to lessen the number and I can truthfully say that the present Council has endeavored to keep up the good work. No department has been the cause of such adverse criticism, and perhaps justly so, but the question is a difficult one and not easily solved. Those of us who live in houses containing what we call "Modern conveniences" can hardly appreciate the conditions under which those who have not got them.

Shortly after being elected, a deputation from Hamilton Avenue waited on me with the complaint that the eschman and night carts never visited that section. Imagine if you can what it might be during the warm season. Many of the houses were severed while others would gladly connect if the Main Sewer were there. The section is a fine residential one with the majority of people owning their houses, yet they had been penalized for years. I am pleased to say we were able to remedy the defect, regarding the removal of waste material and sewerage service almost in to Ayre's Cottages. We are also planning to give those nice little homes on the extension of LeMarchant Road the same facilities. The Cockpit Road has also been served, and we have arranged for an extension on Gear Street. Other places will receive attention as finances permit.

To the few who may think the Council has done nothing during the last four years, let me give the following facts of the water department alone: 35 anti-freezing hydrants erected, 740 repairs made, 3 horse troughs erected, 8,432 feet cast iron pipe laid, 47,850 feet service pipe laid. Beside the foregoing which was new work the Council has looked after the maintenance of the following in the city mains:—2,955 feet 22" cast iron pipe, 23,150 feet 20" cast iron pipe, 33,490 feet 16" cast iron pipe, 10,787 feet 16" cast iron pipe, 10,787 feet 12" cast iron pipe, 14,800 feet 8" cast iron pipe, 99,000 feet 6" cast iron pipe, 13,960 feet 4" cast iron pipe; and also, 3,949 feet 4x7 Concrete Tunnel; 8,000 feet 36" Conduit; 600 feet 30" C. I. Pipe. There are 320 hydrants and 100 mountains in the City which need regular inspection and attention.

So much for the Water Department. I will now give some facts relative to the Sewerage Department. During the last four years we have laid 507, 24" W. Pipe; 2507, 18" W. Pipe; 600 feet 15" W. Pipe; 1500 feet 12" W. Pipe; 2000 feet 8" W. Pipe; 2500 feet 6" W. Pipe; 70 manholes built; 200 gullies built; 200 gullies rebuilt; 80 gullies repaired. We have also maintained 30 miles storm and sanitary sewers, 250 manholes, 45 Miles of House Drains, 1500 gullies, hoppers and matchbasins.

In connection with supply mains and extensions, I feel the following will be read with interest and pride. The new 26 inch extension at Mulholland's Hill was put in use January 13th, 1924 when the big sluice at Powers Hill was opened for the first time. The old 16 inch pipe could only deliver 6½ million gallons water per day. George's Pond reservoir had fallen 8 feet and the pressure at the Water Store was 68lb. per square inch. After opening the rate was raised to 90,000 gal. per day, and the pressure at the Water Store rose to 78lb. per square inch. George's Pond reservoir commenced rising at the rate of one foot per day. The work of maintaining adequate pressure and supply was greatly simplified. No other work for some years has given more satisfaction, and I for one feel proud that I was a party to gaining this important work done. Tomorrow I will deal with roads and other matters. Again thanking you,
I remain,
REG. DOWDEN.

A cheque is not good until it is certified. All Wilson's Bacon is certified—we give a money back guarantee.—Dec 2, 1925.

STEERS Ltd.

Here's a Tempting List
For Everyone
Who Shop Here
