

## No Heat Waylaid

Straight walls in the deep firepot of the Sunshine Furnace prevent ashes from collecting and absorbing the heat instead of allowing it to do its work in heating the home—one of the features that make the Sunshine the kind of furnace you want for your home.

## NEW OATS HURT HORSES

Fall Threshed Crop Must be Fed Judiciously.

Sudden Changes of Feed Particularly To Be Prevented—Waste of Farm Machinery Often Spells Difference Between Profit and Loss for Farmer — Have Corn Machinery in First-Class Order.

(Contributed by Ontario Department of Agriculture, Toronto.)

EACH year brings a certain amount of trouble through the feeding of new grain to live stock, and in seasons like the present when food is scarce and the supply of old grain has been exhausted before the freshly-threshed grain is ready there is a likelihood that more new grain than usual will be fed to the live stock and consequently greater care should be exercised to avoid digestive derangements.

The horse is generally considered a little more susceptible to digestive troubles following changes in feeding practice than are other classes of farm live stock. It is always well to make changes very gradually and carefully. The main grain feed of the horse in this country is oats, and new oats should always be fed with great care. Hard-worked horses should, if it is at all possible, be fed old oats and the new grain left to dry and cure for a few weeks after threshing. At any rate to avoid colic, acute indigestion and inflammation new oats should at first form only a part of the grain ration, being mixed with old oats and possibly a little bran and the percentage of the new grain gradually increased until the horses are on full feed. Sudden changes from old to new grain are especially dangerous with the horse and particularly with the horse at heavy work and on a heavy concentration ration. There is, of course, a difference due to the time of threshing. Grain which remains in stack or mow for several weeks and thus becomes dry and cured is not so dangerous as that threshed directly from the field or immediately after harvesting.

As a rule heavy feeding of grain is not practiced with cattle and sheep on pasture. Where such is the case, however, changing from old to new grain should be done with care and the substitution should be, if possible, gradual. If the ration must, of necessity, be composed entirely of newly-threshed grain it should at first be comparatively light and increased very gradually.

Hogs usually handle newly-threshed grain without much trouble, although if on very heavy rations when finishing for market a little care should be taken that they be not thrown off their feed. Newly-threshed grain is difficult to grind fine and is not easily stored and large quantities of the ground grain may not be stored in bulk as heating and mustiness will result in lowering the feeding value of the grain by rendering it unpalatable and less digestible. Musty grain is more dangerous than clean, new grain.—Prof. W. Toole, Ontario Agricultural College, Guelph.

### Get Corn Binder in Shape.

To handle the corn crop expeditiously, economically, and successfully some kind of a corn harvester is an absolute necessity, and it must be in good working order. Various cheap machines are tried and found wanting, but the corn binder has become a permanent fixture on a large number of farms in this province.

There are several kinds of corn binders on the market, and while each kind may have its special merit as to the arrangement of its essential parts, trouble may arise if these parts are not properly cleaned, oiled and kept in alignment.

The advancing part of the corn binder consists of two diverging jaws which may be raised or lowered by an arrangement of levers. Attached to each jaw are two or three traveling chains, furnished with fingers. Their function is to convey the stalks to the binding deck in an upright position as the machine advances. The chains should not be too loose or they will ride the teeth of the sprocket and slip down the teeth. Machines having packers,—to prevent ears being knocked off by jamming the stalks behind the needle; see to it that the packers yield slightly while the bundle is being tied. Too many bundles crowding the carrier will interfere with the binding attachment properly freeing itself. The knotted and the needle cannot do their work efficiently when covered with rust. Polish them with fine emery cloth. If the knife of the knotted is dull sharpen it or it will cause trouble by pulling the twine from the hook before the knot is made. As it requires considerable power to cut the sappy stubble, and not tear it up by the roots, the knife should be thoroughly keen, otherwise it will clog with grass and weeds. The stubble-cutter should also be kept in good condition. It is a useful device, and when rightly sharpened and adjusted does not add very much to the draft.  
Do not depend on a superficial examination of the machine to ac-

quaint yourself if it needs repairs, because if you do, you will surely miss some small, but vital part needing attention, if not replacing. If these break during the busy season they will cause greater breakages and serious loss.

Clean the machine thoroughly with benzine, gasoline or kerosene. Go over every part of the machine, and while doing this you will locate loose bolts and worn or broken parts. Oil-holes and wells should be cleaned out, and new waste, if required, put into the wells. Refill the grease cups; in short, renew and repair anything and everything that requires attention. Prof. John Evans, Ontario Agricultural College, Guelph.

### Tea With the Prince.

If the London despatch intimating that the Prince of Wales is likely to marry into a ducal family is correct many a man in the trenches, where the young prince is so popular, will feel an almost personal interest. Evidence of the democratic spirit of the Prince of Wales are always coming to light. That he does go among the men in the trenches and talk to them as a comrade who can understand and sympathize is not merely talk, but actual fact. The other day a mother whose oldest son is in France and whose daughter is in Toronto, had a letter from her boy, in which he thanked her for the cake she had sent. "You will be glad to know, mother," ran the letter, "that the cake you sent me was enjoyed by the Prince of Wales. He blew into the dugout the other day just after it had arrived, and I had left the cake in the box. "That cake looks good," he remarked, "so I cut him off a piece, and the orderly made him at all, he is one of the nicest fellows I have met over here."

### Wants a Record.

Prince Edward Island is out for the potato production record of Canada this season. Since March 15 no fewer than 716 carloads, or more than half a million bushels, have been shipped out of the Island Province.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holloway's Corn Cure.

### Try Potato Bread

Every household where homemade bread is baked can save wheat flour by an increased use of potatoes in the bread and still have a most appetizing loaf. Save the left-over potatoes from noon dinner, including the water in which they were boiled, unless it happens that you have boiled them with the jackets on. In this case it is better to use fresh water. Mash the potatoes thoroughly while they are still warm and freshly cooked, add a small quantity of luke-warm water in which the yeast has been dissolved with the required amount of salt and set aside until next morning, then mix into a stiff dough in the ordinary way. Set aside again to prove, and when light knead down once, then let rise until light and mold into loaves. Put into the pans. Let the loaves rise again until light. Bake in a moderate oven.

You can use potatoes up to 50 per cent of the total amount of dough required but when a large proportion of potatoes is used the dough must be very much stiffer accordingly.

The cheapness of Mother Graves' Worm exterminator puts it within reach of all, and it can be got at any druggist's.

Toronto has been billed for the damage done to the Greek restaurants and for one butcher store wrecked in the street disturbance on the night of Aug. 2. The total bill is for \$44,899.23, but this does not include in some instances the daily business loss sustained through the place being closed following the attack.

Some of the barley fields of the province this year will yield 65 bushels to the acre according to the weekly report of the Ontario department of agriculture. The best average return for one county in Ontario last year was less than 40 bushels. The average for the whole province in the banner year of 1915 was only 36 bushels.

Use Millar's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are digested by the powders and are speedily evacuated with other refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

## WHILE AT WAR

Women Suffer at Home

Toronto, Ont.—"I consider Doctor Pierce's Favorite Prescription the very best of women's tonics. I suffered a severe nervous breakdown. I could not sleep, was weak and tired all the time. I took the 'Prescription' and just a few bottles completely built me up and relieved me of my nervous condition. It is a good medicine and I am glad to recommend it.—Mrs. ALYNN SHEPPARD, 259 Seaton St., Niagara Falls, Ont.—"I can safely say that 'Favorite Prescription' did me a lot of good. I at one time developed woman's trouble; my nerves were completely shattered, and I became weak. I had severe backache and pains in my side, extending down into my limbs. I doctored, but did not get relieved of my ailment and was down and out when I began taking Dr. Pierce's Favorite Prescription, and it so completely cured me and restored me to health and strength that I was able to do all my own work and others besides. I do recommend 'Favorite Prescription' to weak and ailing women; they cannot get a better medicine."—Mrs. JOHN LOCKHART, 29 Terrace Ave.

Favorite Prescription is an invigorating, restorative tonic, a soothing and strengthening nerve and a positive remedy for the chronic weaknesses peculiar to women.

This old prescription of Dr. Pierce's is extracted from roots and herbs by means of pure glycerine and is a temperance remedy of 50 years' good standing. Send 10c for trial pkg. of tablets to Dr. V. M. Pierce, Invalids' Hotel, Buffalo, N. Y., or Bridgeburg, Ont.
