

PROSPECTUS FOR 1882.

After careful deliberation, it has been decided to enlarge "THE CANADIAN HORTICULTURIST" to double the amount of reading matter hitherto contained, and to embellish each number with a colored illustration. In doing this, the Directors expect that each member will endeavor to increase the circulation by getting, at least, one more subscriber. Surely that is not asking too much. Will you not, in the interests of Canadian Horticulture, do this much to increase the circulation. The premiums offered this year are the subscribers' choice of any one of the four following articles, to be sent to him by mail in the spring, either 1st, a plant of *Spirea Prunifolia*; or 2nd, a plant of Lee's Prolific Black Currant; or 3rd, three bulbs of *Gladiolus* (see illustration); or 4th, a vine of Moore's Early Grape.

Besides this, each subscriber will receive a copy of the Annual Report of the Fruit Growers' Association for the year 1881, now being printed, which is full of very valuable horticultural information, and gives a complete report of the discussions at their meetings, and the papers read at the meetings in full.

No Canadian who wishes to be fully informed on the Horticultural topics of the day, including fruit, flowers and forestry, can afford to be without this the only Canadian Horticultural Journal, giving the experience of the ablest cultivators in the country.
