

aside good literature to read such trash would be a fool. Ingersoll was a bolder blasphemer of the Creator than he was a soldier. When this gallant "Colonel" went on his first and only skirmish down to Dixie, he allowed himself to be taken prisoner, and General Forest, learning who he was, offered to exchange him for a mule! He was a coward who ought to have been shot, and it was well for the cause of the men of the North that there were so few like him. The Almighty creates men like Ingersoll for some such hidden purpose as he creates skunks and mosquitoes. Even the skunk when dead is of use. Alive, Colonel Ingersoll was a curse. Dead—no doubt he will discover that fact for himself. Dr. Beall will excuse us for reiterating the statement, that in posing as an admirer of a fool, he might exchange his D.D.S. for ASS.

*Catching's Compendium of Practical Dentistry for 1890.* By B. H. CATCHING, D.D.S., Editor and Publisher, Atlanta, Ga. Copyrighted 1890. Atlanta, Ga.: Constitution Publishing Co., 1890. Price \$2.50.

"What is it all about?" That is just what we all wondered; and one has only to get the work of 259 pages to find that in getting an answer, he is practically in pocket a good many dollars; and that Dr. Catching has been garnering the best things in operative and prosthetic dentistry, crown and bridge work, orthodontia, dental medicine, oral surgery, etc., that have appeared in nineteen American, three British, five French, six German, one Austrian, two Cuban, two Italian, one Russian, one Spanish, one Swiss, and one Canadian Dental Journal for 1890. It is, in fact, a valuable compendium for the two classes of people in our ranks—those who read much and those who read little. It will refreshen the memories of the former, and revive the dulness of the latter. It will certainly add a new zest to each new year, in the expectancy of an annual successor.
