

# Listerine

**A Non-toxic, Non-irritant, Non-escharotic  
Antiseptic.**

ABSOLUTELY SAFE, AGREEABLE AND CONVENIENT.

Listerine is a well-proven antiseptic agent—an antizymotic—especially useful in the management of catarrhal conditions of the mucous membrane, adapted to internal use, and to make and maintain surgically clean—aseptic—all parts of the human body, whether by spray, injection, irrigation, atomization, inhalation, or simple local application. : : ; : : : : : : : : :

For diseases of the uric acid diathesis:

## LAMBERT'S LITHIATED HYDRANGEA

A remedy of acknowledged value in the treatment of all diseases of the urinary system and of especial utility in the train of evil effects arising from a uric acid diathesis. A pamphlet of "Clippings" of editorials on this subject may be had by addressing:

**Lambert Pharmacal Co., St. Louis, U. S. A.**

Be sure of genuine Listerine by purchasing an original package.

**T**HE profession is doubtless aware of the great scarcity of cod liver oil and the unprecedented price commanded by the limited supply available. The enormous increase in the cost of Norwegian oil has naturally caused much adulteration and the market is flooded with cod liver oil preparations of very questionable quality.

It is well that the profession has Scott's Emulsion to rely on at such a time. The ingredients entering into our Emulsion receive the same careful blending that they always have, and the principles which guard its manufacture are sufficient assurance that Scott's Emulsion will continue to be the standard, reliable preparation of cod liver oil.

If in your prescriptions you insist upon Scott's Emulsion you may be certain that your patients will get the pure oil in the best and most effective form.

We will send you very shortly a booklet telling more of the present situation in the cod liver oil market.
