NEW YORK AND RBIR RAILWAY.

For Canadian and other travellers, the New York and Drie Railway is one of the most expeditions routes; and for sconery, the most varied and do-lightful on this continent. There is no more atnguitat on this continues. There is no more attractive road to travel on in the world, the cars are so wide, easy riding and cleanly kept. A person has to the, easy thing interesting the April and the room enough to roam around, spread out, rost, take comfort, loan back and onjoy himself. There are other good railroads in the world, but rone whose cars are so attractive as those of the broad gauge, well manage, and rather extensively known New york and Frie Bullway. The steeping cars are better than the bridal couches of our forefathers, and far ahead of what the ancient kings and queens enloyed; and they thought they lived high. A train on this route arrives at and leaves the South side of the Depot, West and of Suspension Bridge, (Canada sile,) so as to form a connection with all other trains calling at this station.

Fifth Year.

REPRESENTATIVE AND CHAMPION OF AMERICAN ART.

THE ALDINE:

ANILLUSTRATED MONTHLY JOURNAL

claimed to be the HANDSOMERT PAPER IN THE WORLD.

"Give my love to the artist working of THI ALDINE who are striving to make their profession worthy of admication for heauty, as it has always been for usefulness,"—Henry Ward Beecher,

THE ALDINE, while issued with all the regularity has none of the temporary or timely interest characteristic of ordinary periodicals. It is an ingant miscellany of pure, light, and graceful literature and a collection of pictures, the rarest specimens, of artistic skill, in black and white. Although each succeeding miniber affords a fresh pleasure to its friends, the real value and hearty of THE ALDINE will be most appreciated affor it has been bound up at the close of the year. While other publications may claim superior cheapness as compared rivals of a similar class, THE ALDINE is a unique and original conception—alone and unapproached—absolutely, without competition or in price or character. The possessor of the volume just completed cannot duplicate the quantity of into paper and engravings in any other shape or number of volumes for ten times its cost.

The labor of getting THE ALDINE ready on the

The labor of getting THE ALDINE ready on the press is so great that reprinting is out of the question. With the exception of a small number specially reserved for binding, the edition of 1871 is already orbanisted and it is now a scarce as well as valuable book.

Now Features for 1872.—Art Dopartment.

The enthusiastic support so readily accorded to their enterprise, wherever it has been introduced in convinced the publishers of THE ADDINE of the soundness of their theory that the American public would recognize and heartily support any sincere client to clevate the tone and standing of illustrated pupileations. That so many weekly wicked sheets usin and thrive is no ovidence that there is no market for anything better—indeed the success of THE ALDINE from the start is direct proof of the centrary. With a population so wast, and of such varied taste, a publisher can choose his patrons, and his paper is rather indicative of his over than of the taste of the country. As a guarantee of the excellence of this department, the publishers would beg to amounce during the coming year, specimens from the following eminent American Artists.

The pictures are being reproduced without regard to expense by the very best sugravers in the country, and will bear the very severest critical comparison with the bert foreign work, it being the determination of the publishers that THE ALDINE shall be a successful via leation of American taste in competition with any existing publication in the world.
